PRODUCT CARE

Metal

For metal care, use a dry or lightly dampened soft cloth. For heavily soiled metal, clean with mild soap and water. If using a damp cloth, dry with a new cloth immediately after. Important things to remember:

- For best results, use a microfiber cloth
- Clean metal frequently. Soiled metal may become corroded.
- Do not use glass cleaner to clean metal.

Glass

Use either a lint-free towel or a simple paper towel and dampen with high-quality glass cleaner. Wipe dry with a fresh paper towel after cleaning to reveal a streak-free shine. Important things to remember:

- Never use glass cleaner on anything other than glass.
- For heavily soiled glass, clean glass with a wet cloth before using glass cleaner.
