Application

The 6-way characterized control valve is ideal for chilled beams, radiant ceilings, and fan coil units offering reduced wiring by using a single actuator instead of two. It eliminates the need for a change-over valve and enables the use of a single coil for heating and cooling.

Operation

A loop pressure relief is designed into port number two (2). This allows the increased pressure to dissipate to the supply loop on port number one (1). This is intended to release any pressure build up in the loop (coil) when the valve is in the closed position and is isolated from the system expansion vessel. The change in pressure occurs due to a change in the media temperature in the coil while isolated from the pressure vessel. The pressure relief does not affect the efficiency of the system because cross-flow cannot occur between the heating and cooling loops. The system loops (heating/cooling) should share a common expansion vessel to keep the system pressure and volume balanced.

Α	В	C	D	E	F	G	H1	H2
7.2"	3.1"	7.9"	6.8"	1.6"	[40]	1.7"	1.2"	0.6"
[182]	[78]	[201]	[173]			[44]	[30]	[15]

Application Notes

If assembled with a MFT actuator, it must be programmed for proportional control only.

The control valve can be mounted either vertically or horizontally. Do not install the valve with the stem pointing downwards.

A single expansion tank is recommended to ensure same pressure on the heating and cooling loops, this helps to maintain energy efficiency by eliminating migration of water from the cooling to the heating loop. Maintenance: 6-Way characterized control valves and rotary actuators are

maintenance-free.

Before any kind of service work is carried out, it is essential to isolate the actuator from the power supply (by disconnecting the power).

Modulating, Non-Spring Return, 24 V, Multi-Function Technology®

Technical Data				
Power Supply	24 VAC, ±20%, 50/60 Hz, 24 VDC, ±10%			
Power consumption in operation	2.5 W			
Power consumption in rest	1.2 W			
position				
Transformer sizing	5 VA (class 2 power source)			
Electrical Connection	18 GA plenum cable with 1/2" conduit			
	connector, degree of protection NEMA 2 /			
Overload Protection	IP54, 3 ft [1 m] 10 ft [3 m] and 16ft [5 m] electronic thoughout 090° rotation			
Operating Range	210 V (default), 420 mA w/ ZG-R01 (500			
Operating range	Ω , 1/4 W resistor), variable (VDC, on/off,			
	floating point)			
Operating range Y variable	Start point 0.530 V			
	End point 2.532 V			
Input Impedance	100 k Ω for DC 210 V (0.1 mA), 500 Ω for			
	420 mA, 1500 Ω for PWM and On/Off			
Position Feedback	210 V, Max. 0.5 mA, VDC variable			
Angle of rotation	90°			
Direction of motion motor	selectable with switch 0/1			
Position indication	Mechanically, pluggable			
Manual override	external push button			
Running Time (Motor)	default 150 s, variable 35150 s			
Ambient humidity	max. 95% r.H., non-condensing			
Ambient temperature	-22122°F [-3050°C]			
Storage temperature	-40176°F [-4080°C]			
Degree of Protection	IP54, NEMA 2, UL Enclosure Type 2			
Agency Listing	cULus acc. to UL60730-1A/-2-14, CAN/CSA			
	E60730-1:02, CE acc. to 2014/30/EU			
Noise level, motor	35 dB(A)			
Servicing	maintenance-free			
Quality Standard	ISO 9001			
Weight	1.5 lb [0.70 kg]			

†Rated Impulse Voltage 800V, Type action 1.B, Control Pollution Degree 3.

Modulating, Non-Spring Return, 24 V, Multi-Function Technology®

Wiring Diagrams

X INSTALLATION NOTES

Provide overload protection and disconnect as required.

Only connect common to negative (-) leg of control circuits.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

Actuators may also be powered by 24 VDC.

A 500 Ω resistor (ZG-R01) converts the 4 to 20 mA control signal to 2

Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 VAC line.

For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.

IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).

Actuators with plenum cable do not have numbers; use color codes instead

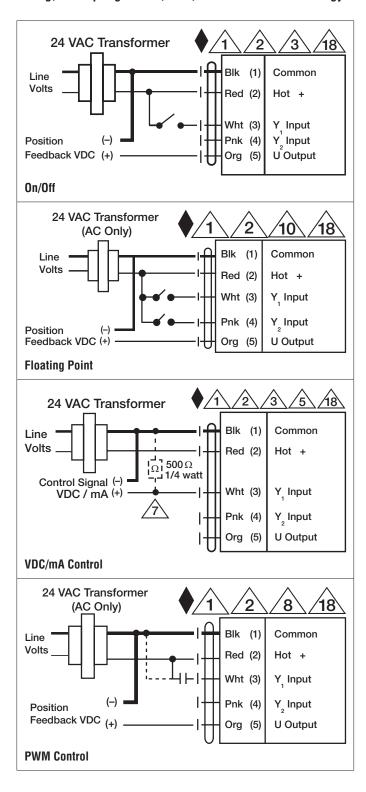

Meets cULus requirements without the need of an electrical ground connection

WARNING! LIVE ELECTRICAL COMPONENTS!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
