B325-740-700 Technical Data Sheet Chrome Plated Brass Ball and Nickel Plated Stem, 1", NPT Female Ends

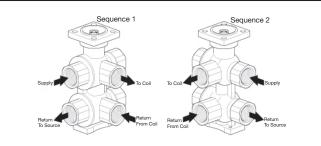

Technical Data			
Fluid	chilled or hot water, up to 60% glycol		
Flow characteristic	linear		
Controllable flow range	sequence 1 (angle 030°), dead zone (3060°),		
	sequence 2 (angle 6090°)		
Valve Size [mm]	1" [25]		
Pipe connection	NPT female ends		
Housing	Nickel-plated brass body		
Ball	chrome plated brass		
Stem	nickel-plated brass		
Stem seal	EPDM (lubricated)		
Seat	PTFE		
O-ring	EPDM		
Characterized disc	chrome plated steel		
Body Pressure Rating	232 psi		
Close-off pressure Δps	50 psi		
Weight	7.9 lb [3.6 kg]		
Fluid Temp Range (water)	43180°F [682°C]		
Leakage rate	0%		
Seq 1 Cv	7.4		
Seq 2 Cv	7		
Servicing	maintenance-free		

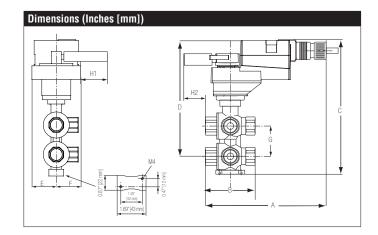

Application

The 6-way characterized control valve is ideal for chilled beams, radiant ceilings, and fan coil units offering reduced wiring by using a single actuator instead of two. It eliminates the need for a change-over valve and enables the use of a single coil for heating and cooling.

Operation

A loop pressure relief is designed into port number two (2). This allows the increased pressure to dissipate to the supply loop on port number one (1). This is intended to release any pressure build up in the loop (coil) when the valve is in the closed position and is isolated from the system expansion vessel. The change in pressure occurs due to a change in the media temperature in the coil while isolated from the pressure vessel. The pressure relief does not affect the efficiency of the system because cross-flow cannot occur between the heating and cooling loops. The system loops (heating/cooling) should share a common expansion vessel to keep the system pressure and volume balanced.

Suitable Actuators				
	Non-Spring			
B325-740-700	NRB(X)			

A	В	С	D	E	F	G
8.0" [203]	4.8" [121]	10.0"	8.6" [218]	1.6"	[40]	2.8" [70]
		[254]				

Application Notes

If assembled with a MFT actuator, it must be programmed for proportional control only.

The control valve can be mounted either vertically or horizontally. Do not install the valve with the stem pointing downwards.

A single expansion tank is recommended to ensure same pressure on the heating and cooling loops, this helps to maintain energy efficiency by eliminating migration of water from the cooling to the heating loop. Maintenance: 6-Way characterized control valves and rotary actuators are maintenance-free.

Before any kind of service work is carried out, it is essential to isolate the actuator from the power supply (by disconnecting the power).

NRX24-MFT Technical Data Sheet

Modulating, Non-Spring Return, 24 V, Multi-Function Technology®

Technical Data			
Power Supply	24 VAC, ±20%, 50/60 Hz, 24 VDC, ±10%		
Power consumption in operation	3.5 W		
Power consumption in rest	1.3 W		
position			
Transformer sizing	6 VA (class 2 power source)		
Electrical Connection	18 GA plenum cable, 3 ft [1 m], with 1/2" conduit connector (10 ft [3 m] and 15 ft [5 m] available)		
Overload Protection	electronic throughout 095° rotation		
Operating Range	210 V (default), 420 mA w/ ZG-R01 (500 Ω , 1/4 W resistor), variable (VDC, PWM, on/ off, floating point)		
Operating range Y variable	Start point 0.530 V End point 2.532 V		
Input Impedance	100 kΩ for DC 210 V (0.1 mA), 500 Ω for 420 mA, 1500 Ω for PWM and 0n/Off		
Position Feedback	210 V, Max. 0.5 mA, VDC variable		
Angle of rotation	Max. 90°, adjustable with mechanical stop		
Direction of motion motor	selectable with switch 0/1		
Position indication	Mechanically, integrated, two-section		
Manual override	external push button		
Running Time (Motor)	default 150 s, variable 45150 s		
Ambient humidity	max. 95% r.H., non-condensing		
Ambient temperature	-22122°F [-3050°C]		
Storage temperature	-40176°F [-4080°C]		
Degree of Protection	IP54, NEMA 2, UL Enclosure Type 2		
Housing material	UL94-5VA		
Agency Listing	cULus acc. to UL60730-1A/-2-14, CAN/CSA E60730-1:02, CE acc. to 2014/30/EU and 2014/35/EU		
Noise level, motor	45 dB(A)		
Servicing	maintenance-free		
Quality Standard	ISO 9001		
Weight	3.2 lb [1.5 kg]		

 $\ensuremath{ \uparrow \text{Rated Impulse Voltage 800V}, \ensuremath{ \text{Type of action 1.AA}, \ensuremath{ \text{Control Pollution Degree 3}}$

Modulating, Non-Spring Return, 24 V, Multi-Function Technology®

🔀 INSTALLATION NOTES

Provide overload protection and disconnect as required.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

- Actuators may also be powered by 24 VDC.
- Only connect common to negative (-) leg of control circuits.

A 500 Ω resistor (ZG-R01) converts the 4 to 20 mA control signal to 2 to 10 VDC.

For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.

IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).

Actuators with plenum cable do not have numbers; use color codes instead.

Meets $\ensuremath{\mathsf{cULus}}$ requirements without the need of an electrical ground connection.

WARNING! LIVE ELECTRICAL COMPONENTS!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
