## **EV125S-285 Technical Data Sheet**

Stainless Steel Ball and Stem, Female NPT Ends

|  | o year warre                                 |
|--|--|
|  |  |
| Technical Data                             |  |
| Fluid                                      | chilled or hot water, up to 60% glycol max   |
| Flour above etaviatio                      | (open loop/steam not allowed)                |
| Flow characteristic                        | equal percentage or linear                   |
| GPM Range                                  | 8.6-28.5                                     |
| Valve Size [mm]                            | 1.25" [32]                                   |
| Pipe connection                            | NPT female ends                              |
| Housing                                    | Nickel-plated brass body                     |
| Flow measuring pipe                        | brass body nickel-plated                     |
| Ball                                       | stainless steel                              |
| Stem                                       | stainless steel                              |
| Stem seal                                  | EPDM (lubricated)                            |
| Seat                                       | PTFE   |
| O-ring                                     | EPDM   |
| Characterised disc                         | TEFZEL®                                      |
| Body Pressure Rating                       | 360 psi                                      |
| Differential Pressure Range                | 5 to 50 psid or 1 to 50 psid see flow        |
| _  | reductions chart in tech doc                 |
| Close-off pressure ∆ps                     | 200 psi                                      |
| Inlet Length to Meet Specified             | 5X nominal pipe size (NPS)                   |
| Measurement Accuracy                       |  |
| Ambient humidity                           | max. 95% r.H., non-condensing                |
| Measuring accuracy flow                    | ±2%*   |
| Control accuracy                           | ±5%  |
| Flow Measurement Repeatability             | ±0.5%  |
| Sensor Technology                          | ultrasonic with glycol and temperature       |
|  | compensation                                 |
| Temperature Sensors                        | Pt1000 insertion sensors w/NPT body          |
| Temperature Measurement                    | According to Pt1000 DIN EN60751 Class I      |
| Tolerance Resolution of Temperature Sensor | 0.18°F [0.1°C]                               |
| Rated impulse voltage supply               | actuator/sensor: 0.8 kV (in accordance       |
| hated illipuise voltage supply             | with EN60730-1) kV                           |
| Rangeability Sv                            | 100:1  |
| Degree of Protection                       | NEMA 1, UL Enclosure Type 1                  |
| Weight                                     | 8.4 lb [3.8 kg]                              |
| Remote Temperature Sensor                  | Standard: 2 ft. 7.5 in. [0.8m], 9.8 ft. [3m] |
| Lenath                                     | Standard. 2 to 7.0 m. [0.0m], 0.0 to [0m]    |
| Fluid Temp Range (water)                   | 14250°F [-10120°C]                           |
| Leakage rate                               | 0%   |
| Glycol Measurement Accuracy                | ±5%  |

<sup>\*</sup>All flow tolerances are at 68°F (20°C) & water.

### **Application**

Water-side control of heating and cooling systems for AHUs and water coils. Equal Percentage/ Linear: heating and cooling applications.

### Operation

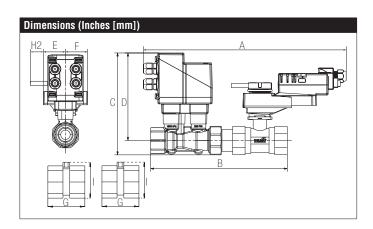

The Energy Valve is an energy metering pressure independent control valve that measures, documents and optimises water coil performance.

### **Product Features**

The Energy Valve measures energy using its built-in electronic flow sensor and supply and return temperature sensors. Controls power with its power control logic providing linear heat transfer regardless of temperature and pressure variations. Manages low delta-T with its built in Delta-T manager. Measures glycol with advanced algorithms in its built in flow sensor. An IoT device utilising cloud-based technology to optimise performance.

**Suitable Actuators** 

|            | Non-Spring | Electronic fail-safe |  |  |

The Energy Valve is based on Belimo patent and patent pending technology, US-Patent 6,039,304: ball rile Eliefgy valve is based on belinio patent and patent perioding technology, 05-ratent 6,059,304. Dail valve with modified characteristics, US-Patent Pending: 2011/0153089: HVAC actuator comprising a network interface, data store and a processor, US-Patent Pending: 2009/009115: control of sensor less and brushless DC-Motor.

The Energy Valve incorporates additional technology - powered by Optimum Energy TM.

### Safety Notes

WARNING: For Belimo products sold in California: these products do or may contain chemicals which are known to the State of California to cause cancer and or birth defects or other reproductive harms. For more information see www.p65warnings.ca.gov.

## NRX24-EV Technical Data Sheet

Modulating, Non-Spring Return, 24 V, Shared Logic Technology®

### Wiring Diagrams

### X INSTALLATION NOTES

Actuators with appliance cables are numbered.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

Actuators may also be powered by 24 VDC.

Actuators with plenum cable do not have numbers; use color codes instead. Meets cULus requirements without the need of an electrical ground

connection.

## WARNING! LIVE ELECTRICAL COMPONENTS!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
