P6400SU-317 Technical Data Sheet

EL 11	1.11 1 1 1 1 200/ : :				
Fluid	chilled or hot water, up to 60% glycol max				
Flow characteristic	(open loop/steam not allowed) equal percentage or linear				
Valve Size [mm]	4" [100]				
Pipe connector	pattern to mate with ANSI 125 flange				
Housing	Cast iron - GG 25				
Flow measuring pipe	Ductile cast iron - GGG50				
Rall	stainless steel				
Stem	stainless steel				
Stem seal	EPDM (lubricated)				
Seat	PTFF				
	Viton				
O-ring Characterized disc	stainless steel				
***************************************	FPDM				
Package					
Body Pressure Rating	ANSI Class 125, standard class B				
ANSI Class	125				
Number of Bolt Holes	8				
Differential Pressure Range	550 psi or 150 psi see flow reductions				
Close-off pressure ∆ps	chart in tech doc 175 psi				
Ambient temperature	-22122°F [-3050°C]				
•					
Inlet Length to Meet Specified Measurement Accuracy	5X nominal pipe size (NPS)				
Ambient humidity	max. 95% r.H., non-condensing				
Measuring accuracy flow	+2%*				
Control accuracy	+5%				
Flow Measurement Repeatability	±0.5%				
Sensor Technology	ultrasonic with glycol and temperature				
Consor roomiciogy	compensation				
Rangeability Sv	100:1				
Power supply for the flow sensor	sensor is powered by the actuator				
Weight	103 lb [47 kg]				
GPM	317				
Fluid Temp Range (water)	14250°F [-10120°C]				
Leakage rate	0%				

^{*}All flow tolerances are at 68°F (20°C) & water.

Application

Water-side control of heating and cooling systems for AHUs and water coils. Equal Percentage/ Linear: heating and cooling applications.

Operation

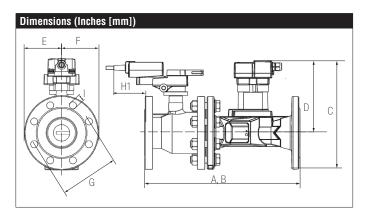

The Electronic Pressure Independent Control Valve is a two-way valve that maintains constant flow regardless of pressure variations in the system.

Product Features

Provides constant flow regardless of pressure variations in the system. Maximizes chiller Delta T, preventing energizing additional chillers due to low Delta T. Simplified valve sizing and selection, no Cv calculations required.

Suitable Actuators

	Non-Spring	Electronic fail-safe

Wiring Diagrams

X INSTALLATION NOTES

Provide overload protection and disconnect as required.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

Actuators may also be powered by 24 VDC.

provided for reference. Actuators are provided with a numbered screw terminal strip instead of

Actuators are provided with color coded wires. Wire numbers are

IN4004 or IN4007 diode required

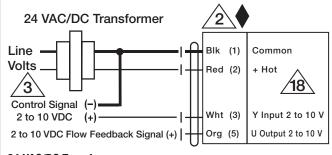

Meets cULus requirements without the need of an electrical ground connection.

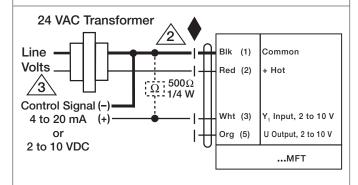

WARNING! LIVE ELECTRICAL COMPONENTS!

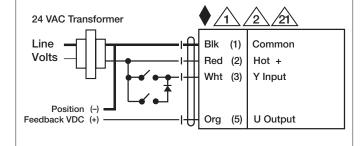

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

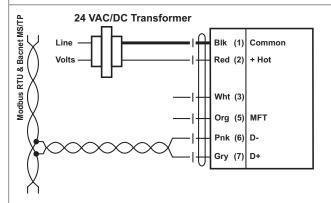

GRX24-EP2-MOD Technical Data Sheet

24 VAC/DC Transformer

Modbus & BACnet control for Non-Spring Return

Note:

Modbus signal assignment:

 $C_1 = D_1 = A$

 $C_2 = D + = B$

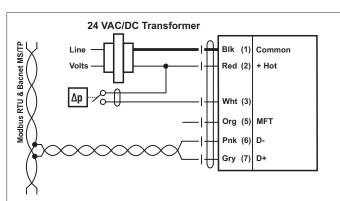

Power supply and communication are not

galvanically isolated.

Interconnect ground signal of the devices.

GRX24-EP2-MOD Technical Data Sheet

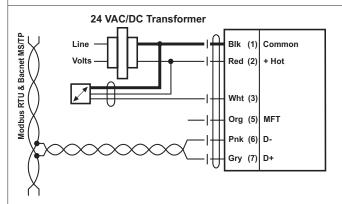

Modbus & BACnet control with switching contact for Non-Spring Return

Requirements for switching contact:

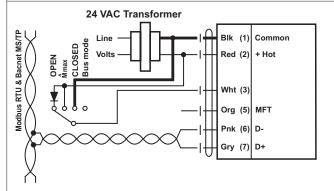

The switching contact must be able to accurately switch a current of 16 mA at 24 V.

Modbus &BACnet control with active sensor for Non-Spring Return

Possible input voltage range:

0...32 V (resolution 30 mV)

Modbus & BACnet control with local override (AC only, analog override) for Non-Spring Return

Note

If no sensor is integrated, then connection 3 (Y) is available for the protective circuit of a local override control. Options: CLOSED, Vmax, OPEN
