

CDC CLOTH MASK:

MATERIALS:

Two 10"x6" rectangles of cotton fabric

Two 6" pieces of elastic

Needle & thread

Scissors

Sewing machine

TUTORIAL:

1. Cut two 10x6 in. rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. Stack two rectangles.

2. Fold over long sides 1/4 in. & hem. Fold the double layer of fabric over 1/2 in. along the short sides & stitch down.

3. Run 6-in. length of 1/8-in. wide elastic through wider hem on each side of mask. These will be the ear loops. Use a large needle/bobby pin to thread through. Tie the ends tight.

4. Gently pull on elastic so knots are tucked inside hem. Gather sides of the mask on the elastic & adjust so mask fits your face. Securely stitch elastic in place to keep from slipping.

KEEPING CUSTOMERS & TEAM MEMBERS SAFE

Nixon Power Services is passionate about keeping our **CUSTOMERS** and **TEAM MEMBERS** safe during this time, while continuing to provide 24/7 premium generator service. On April 3, the U.S. Centers for Disease Control and Prevention issued a recommendation for people to wear cloth face **MASKS** in public settings where other social distancing measures are difficult to maintain. However, finding masks has been a difficult task to accomplish.

With this in mind, family members came together to provide our technicians with reusable **HANDMADE** masks following CDC guidelines. Masks can be created with a sewing machine, t-shirt and scissors or even a bandana. Pat Fox (mother of Mike Schindler - Aftermarket Operations Manager) was one of the many who put her sewing skills to use to provide these masks. In her words,

"I WANTED TO DO MY PART TO MAKE A DIFFERENCE IN ANY WAY THAT I COULD AND AM HAPPY TO HELP TEAM NIXON."

THANK YOU

Thanks to the many contributions, roughly **120** masks have been made and distributed to Nixon team members. Technicians and Project Engineers are able to **SAFELY** respond to the needs of our customers.

Greg Frost, Director of Aftermarket Operations, expressed his gratitude for the many who contributed by stating,

“I would like to personally **THANK** the family members and the employees who took time to construct homemade masks for our 75 **TECHNICIANS**. These masks will be used as primary and secondary protection to prevent the possible spread of **COVID-19** amongst fellow team members and those customers where social distancing is difficult to maintain. Thanks to you and your contributions - Nixon’s critical technician team has **NOT SEEN ANY ACTIVE CASES.**”

Nixon will continue to work as a team to provide a safe and premium customer experience 24/7.

“INDIVIDUAL COMMITMENT TO A GROUP EFFORT - THAT IS WHAT MAKES A TEAM WORK, A COMPANY WORK, A SOCIETY WORK, A CIVILIZATION WORK.”
Vince Lombardi
