STREET SERIES SUBWOOFERS

FEATURES

Introducing the trunk thumping Street series subwoofers from EDGE

The Street series subs have been designed from the ground up to produce awesome musical bass, using double stacked magnets to generate large magnetic force we are able to control the subwoofer with pin point accuracy while maintaining a high level of excursion and SPL.

Available currently in 10, 12, 15 and 18 inch variants the use of polycotton spiders, non-pressed paper cones and stitched tinsel leads we are able to create a high quality product that produces accurate loud bass.

For anyone looking for hard hitting street bass look no further than our Street series subs.

FEA CONE

Cone designed using Finite Element Analysis to ensure maximum rigidity to weight ratio.

JUMBO ROLL FOAM SURROUND

This oversized surround gives ultimate control of long excursion while aiding with increasing the power of the woofer and still keeping linear movement.

TORSION BASKET

New precision built basket, designed to offer the best and most efficient critical dimensions for a subwoofer, a significant increase in performance over common baskets.

FEMM MOTOR

Motor system designed using Finite Element Method magnetics delivering low distortion and linear flux saturation

ANODISED FORMER

The black anodized Voice coil former is used for aiding heat dissipation, this acts as a heatsink and pulls the heat away from the VC wires to increase with power and thermal handling

STITCHED TINSEL LEADS

Stitching the tinsel leads into the spiders ensures and improved reliability and performance as this reduced the fatigue on the wire and elevates and possibility of shorting
