

# SW200 Shake Up Wake Up Alarm Clock

## Wake up four different ways.

The SW200 ShakeUp to WakeUp Dual Large Display Alarm Clock allows you to choose the wake-up option that works best for your needs: the shaker, shaker plus sound, flashing lights plus sound, or shaker plus flash. The tone is adjustable in volume up to 87 dB as well as in pitch, which is important to those with hearing losses, as certain tones may be difficult to hear.

The SW200 ShakeUp to WakeUp Dual Large Display Alarm Clock incorporates Square Wave technology, a 520 Hz sound wave pattern proven to be more effective in waking people with hearing loss, children and heavy sleepers than standard alarm clocks. Dual alarm options, a plug that allows you to plug your lamp in for a flashing light alarm, large display and a sophisticated, stylish form make this clock the perfect choice.
