## **AquaRinse-Series 6**

## Backwash Mixed Bed Carbon Filter Systems

AquaCera® AquaRinse Series 6 maximum chemical reduction carbon filter systems. These backwash mixed bed carbon systems are a must for those on city water supplies as they are designed to remove chloramine and disinfection byproducts from all the water entering into your home. The Series 6 backwash system utilizes a mixed bed of carbon medias and KDF. A Point-Of-Use drinking system can be added for optimum filtration benefit. These systems are virtually maintenance free and are easily installed.

The AquaCera® Series 6 Mixed Bed carbon systems use only the finest materials of construction and highest quality blend of assorted carbon medias found in the world. Designed for many years of daily use without any routine maintenance, and trouble-free performance. Enhances the quality of your water supply at every tap.

## Benefits:

- Great tasting, clean and clear water
- Easy installation
- 2+ million gallons of filtered, chemical free water at every tap (sizes vary)
- Chloramines removal
- Chlorine, THM's, herbicides and pesticides
- Volatile Organic Chemicals
- Heavy Metals reduction
- Fluoride reduction (all types)

The Series 6 systems utilize a mixed bed of carbon medias; AquaMetix® granular blend, a premium grade coconut shell, a proprietary coal base carbon, and KDF. The combination of these medias is designed to reduce or remove the widest array of contaminants typically found in municipally treated and/or rural well water supplies.

The Series 6 is our premium whole house filter tank system.

Removal of chloramine, chlorine, VOC's and heavy metals. Reduces a wide range of contaminants, lead, pesticides, trihalomethanes, pharmaceutical compounds, PFAS & PFOS, and fluoride.

Part Number	Media Qty.	Tank Size	Peak Flow GPM	Height (inches)
ARBTC-CBTS12	2 cu. ft.	12" x 52"	12 GPM	60
ARBTC-CBTS14	3 cu. ft.	14" x 65"	14 GPM	74
ARBTC-CBTS16	4 cu. ft.	16" x 65"	17 GPM	74
