

AMD Mini™ Pump Dispensers

Airless Metered Dose Dispensing

This new portfolio of Airless Metered Dose Dispensers was engineered for dose accuracy with a professional yet cosmetic appeal. The AMD Mini™ system was designed to maintain the integrity of a formulation, enabling an air-tight containment system but still allow users to dispense preparations easily and accurately. Ideal 0.25ml dose volume for multiple dosing variation preferences.

- Airless system perfect for oxidation prone formulations
- Precise and repeatable metered dose dispensing (0.3ml/pump)**
- Transparent bottle for visual content level
- Easy top-fill
- Snap-lock pump for tamper resistance
- Bottles constructed of natural polypropylene
- Dispenses in any position (360°)
- 99% product evacuation with minimal priming
- No metal contact with contents
- Easy one pump dosing
- Professional cosmetic appearance
- meets current airline carry-on regulations (100ml/3.4oz)
- Pumps sold separately from bottles
