

FOS-A™ Fixed Oil Suspension Vehicle

Technical Data Sheet

CATEGORY	FOS-A™ is our version of the traditional anhydrous fixed oil suspension vehicle still widely used in compounding today. With a long history as a simple yet dependable oral grade suspension vehicle, FOS-A™ is suitable for oil-filled capsules, veterinary compounds, and sublingual preparations. Oil based vehicles can help coat bitter drug particles improving palatability. Our expanding line of oil-soluble flavors, sweeteners, and proprietary Bitter-Bloc WS/OS Liquid Concentrate can also be incorporated to further improve a prescription's palatability.
INGREDIENTS	Almond Oil NF (Sweet) Colloidal Silicon Dioxide, NF Butylated Hydroxytoluene, NF (BHT) (preservative) 0.02%
