

RocketMolds™

Suppository Compounding Molds

Another SpecializedRx Innovation

Many areas of pharmacy compounding have been adopted from large scale manufacturing processes, technology, systems, and containers. Suppository compounding is no exception to this with the common use of thin-walled PVC suppository shells designed for large scale manufacturing on reels. Used for compounding, these large reels of shells present several challenges for compounders and their patients. RocketMolds™ are a patent pending, first of their kind, disposable molds & containment system, designed specifically for the compounding pharmacist to efficiently compound suppositories in an easily sealable container that is also patient friendly with the following benefits:

Patent Pending

- Easy-to-fill 12mm wide opening
- string of 10 molds that easily twist apart
- Designed to securely stand up and close in our 60ct RocketMolds™ Holder
- Molded from a flexible FDA compliant polyethylene for maximum compatibility
- Transparent for easy visual of contents
- Easy-to-read graduated fill line for accurate filling
- Durable - retains its shape
- unlike thin wall shells that can be damaged in transit
- Easy patient “Flex Tab & Squeeze-Out” dispensing **directly into an SRx applicator**
- One piece design with an easy-to-seal snap shut cover - No more heat sealing or leaking
- Contents retain their shape even if melted
- Various **colors available** for **easy** visual dose recognition
- UV Protection
- Made in the USA
- Recyclable

PolyBlend Rx™ Suppository Base (Item# B0060)

PolyBlend Rx is an anhydrous granular form pharmaceutical base used in the preparation of suppositories when a water-soluble or water-miscible base is preferred.

Witepsol® H15 (NF) Suppository Base (Item# B0066)

Witepsol®H15 is an NF grade, small pastille form suppository base comprised of glycerides from vegetable origins with a long history of use with a wide range of APIs. Suitable for both rectal and vaginal use.

Supposi-plex™ R36 Suppository Base (Item# B0040)

Supposi-Plex R36 is a highly versatile pellet form suppository base with a long history of use in a wide range of APIs. 100% derived from vegetable origin. Non-irritating, generally recommended for rectal suppositories.

Supposi-plex™ V33 Suppository Base (Item# B0050)

Supposi-Plex V33 is a pellet form, easy to use compounding suppository base that is derived from vegetable and fatty alcohol origins. non-irritating and generally recommended primarily for vaginal suppositories.

Supposi-plex™ V65 Emulsifying Suppository Base (Item# B0061)

Supposi-Plex™ V65 is a unique emulsifying suppository and ovule base formulated primarily for vaginal compounding for female hormones and vasodilators but also suitable for rectal applications.

HyaluronV™ Anhydrous Emulsion for Vaginal Applications (Item# B0207)

HyaluronV™ is a proprietary anhydrous base infused with hyaluronic acid (sodium hyaluronate-HA) through a unique microsphere technology specific to SpecializedRx for use in pharmaceutical formulations.

HyaluronV™ LIGHT Anhydrous Emulsion for Vaginal Applications (Item# B0205)

HyaluronV™ LIGHT is a reduced viscosity formulation.
