

THE SOLUTION TO OFF-TASTING ORAL PREPARATIONS

# SuspendRx™ Anhydrous

## Oral Suspension Vehicle

With Bitter-Bloc™ Technology

SuspendRx Anhydrous with Bitter Bloc™ gives pharmacists the convenience of a universal suspension vehicle with excellent suspending properties as well as the solution to bitter or off-tasting oral preparations.

"If it doesn't taste good, no one will come back. The biggest barrier to getting repeat customers is to make a product that not only has functional ingredients but also doesn't compromise on taste."

- ✓ Elegant Palatability
- ✓ Natural Plant Based Ingredients
- ✓ Mild to No Taste or Smell
- ✓ Fortified with Bitter-Bloc™ Technology
- ✓ Allergen-Free
- ✓ Water and Oil Miscible Flavor Ready
- ✓ GRAS Status Ingredients

### SuspendRx™ Anhydrous Features

SuspendRx Anhydrous oral suspension base allows for easy compounding of lipophilic, water-unstable APIs, or where aqueous stability of a drug in suspension is unknown. SuspendRx Anhydrous is an elegant, mild to no taste or smell, easy to use, white opaque plant-based oral suspension vehicle that is preservative-free.

SuspendRx Anhydrous gives pharmacists the convenience of a universal suspension vehicle with excellent suspending properties and stability profile including 180-day beyond-use dating (BUD) per USP <795>. With adults, children, and animals in mind, SuspendRx Anhydrous is allergen, dye and antioxidant BHT free.

SuspendRx Anhydrous unsweetened and sweetened are pharmaceutical grade, natural plant-based ingredients, Kosher / non-GMO certified. Both forms are fortified with our

Bitter-Bloc™ Technology for optimal palatability.

Bitter-Bloc™ is the next generation technology protein to block flavor defects Naturally. It is the solution to bitter and off-tasting oral preparations. Discover the endless possibilities to correct flavor defects in your compounded oral suspensions.

Other products on the market simply mask flavor defects, Bitter-Bloc™ actually blocks flavor defects from reaching taste receptors on the tongue to prevent the bitter molecules from binding with the receptor sites. In effect, it gives the product a cleaner taste. This allows formulators to use ingredients that meet consumer demand without compromising on taste. Bitter-Bloc™ works to eliminate bitter, salty, metallic, astringent, and general off-notes in a variety of oral formulations.
