## **Varify** Complete Water Test Kit Record Chart

| Parameter         | Test 1<br>Date:     | Test 2<br>Date:     | Test 3<br>Date:     | EPA Primary (*)<br>& Secondary Limits<br>for Drinking Water | Comments |
|-------------------|---------------------|---------------------|---------------------|---|----------|
| рН                |                     |                     |                     | 6.5-8.5   |          |
| Hardness          | ppm                 | ppm                 | ppm                 | 10-100 ppm  |          |
| Hydrogen Sulfide  | ppm                 | ppm                 | ppm                 | 0 ppm   |          |
| Iron              | ppm                 | ppm                 | ppm                 | 0.3 ppm   |          |
| Copper            | ppm                 | ppm                 | ppm                 | 1.3 ppm *   |          |
| Lead              | ppm                 | ppm                 | ppm                 | 0.015 ppm *   |          |
| Manganese         | ppm                 | ppm                 | ppm                 | 0.1 ppm   |          |
| Total Chlorine    | ppm                 | ppm                 | ppm                 | 4 ppm *   |          |
| Mercury           | ppm                 | ppm                 | ppm                 | .002 ppm *  |          |
| Nitrate           | ppm                 | ppm                 | ppm                 | 10 ppm *  |          |
| Nitrite           | ppm                 | ppm                 | ppm                 | 1 ppm *   |          |
| Sulfate           | ppm                 | ppm                 | ppm                 | 250 ppm   |          |
| Zinc              | ppm                 | ppm                 | ppm                 | 5 ppm   |          |
| Fluoride          | ppm                 | ppm                 | ppm                 | 4 ppm *   |          |
| Sodium Chloride   | ppm                 | ppm                 | ppm                 | 250 ppm   |          |
| Total Alkalinity  | ppm                 | ppm                 | ppm                 | 75-150 ppm  |          |
| Coliform Bacteria | Positive / Negative | Positive / Negative | Positive / Negative | Negative result *   |          |

We recommend performing the 16-in-1 test at least two times per occasion and averaging your results. This will reduce the potential for user error. **Note:** 1 ppm = 1 mg/L Scan this QR code or visit resources.varifytest.com to download and print a new chart
