Safe Hygiene

The cleaning system with "disposable wet wipes" guarantees the best hygienic safety in any situation or environment (health, transport, hospitality, cohabitation). Avoids cross contamination. The WHO and ISS guidelines recommend its use for the containment of viruses in the workplace.

Ergonomics and costs

They reduce the effort associated with water and washing machine management (transport and filling / emptying the bucket, dosage and impregnation, reconditioning). The cloths are pre-soaked with detergent / sanitizing solution. Eliminating dosage + wringing + reconditioning + storage significantly reduces the cost in use = time = labor.

Low environmental impact

No difficult-to-dispose of black water is produced, there is no consumption of water or electricity (i.e. machine washing)

cod. A386

cod. A764

70% alcohol (v / v) pre-impregnated single use wipe

Name	cod	EAN code	Pack
Hygienizer wipes ALX	A764	8032754457641	20 pz
Hygienizer wipes ALX	A386	8032754453865	60 pz

DESTINATION OF USE	All surfaces
MAIN AREAS OF APPLICATION	Health, industry, horeca, offices
