

# GPS Tracking & Temperature monitoring

From your phone or computer

Run Hours

Temperature

Door Open

Location Tracking

## Key Benefits:

- Peace of mind with **24/7/365 monitoring** – location and temperature.
- Access data anytime, anywhere on any device – PC or smartphone.
- Record cool room temperatures – protect your business from potential litigation.
- Improve Operational Efficiency locating inventory for mobilisation/demobilisation.
- Door open monitoring – help understand cool room efficiency.
- Discrete output – to activate buzzer, strobe light, compressor disable, etc. on certain events.
- Easy installation – mount sensor inside and Falcon Tracker mounted outside of cool room.
- Power the tracker externally (4 – 16 Vdc) and/or 3 x AA batteries (battery life >12 months with hourly updates)
- Full audit trail from sensor through to alert messages.
- Geo-fences that alert on entering or leaving – know when cool rooms exit or enter your premises.
- **Low cost solution** made possible by Cloud based Technology

## Low-cost:

- [Falcon GPS Tracker](#) and temperature sensor: \$399.00
- Monthly data hosting subscription: \$18.00 per month

Prices exclude GST.
