

G2 TRAILER

with elliptic rotor pump (patented)

Ideal for the transfer of grapes and driven by the Cardan shaft of the tractor.

Acts by pressure and not by centrifugal force, it assures the best possible treatment of the pumped product preventing breakage of the grape-stalks and crushing of the skins and pips.

Stainless steel container, chassis and auger. Mechanical brakes, electrical system, homologation for road circulation following Italian rules.

On request:

- Cardan shaft | Hydraulic brakes | Top flaps | Flexible tube | Electrical motor.

Technical Data		
	G2 mc 3	G2 mc 4,40
Capacity	MC 3	MC 4,40
Auger on bottom of container	Ø 220mm	Ø 220mm
Pump rotation speed	58 giri/min	58 giri/min
Pump discharge outlet	Ø 100/120	Ø 100/120
Weight	680kg	750kg
Unloading lenght	7-8m	7-8m
A - Overall length	4615mm	4615mm
B - Container length	3000mm	3000mm
C - Discharge length	515mm	515mm
D - Drawbar length	1100mm	1100mm
E - Container width	1500mm	1800mm
F - Height from the ground	1370mm	1600mm
