Product Description —

If your playground already features arch post designs, the 8 feet High Elite Arch Post Adaptive Swing will fit in beautifully. And with the post pitched inside the ground at four places, kids can swing back and forth without feeling a wobble. This swing is an essential structure if you're serious about making your playground truly inclusive. It caters to both children and adults with disabilities by providing an adaptive seat with safety belts for extra security and support. The frame is made from tough metal and finished with a high-quality powder coating. So rest assured, the swing will last through all kinds of weather and stay sharp season after season. The 8 feet High Elite Arch Post Adaptive Swing also comes with customization options to help you create the perfect look. You can choose from Rainforest Green or Pacific Blue for the frames for quick delivery. The Adaptive Swing seat itself is available in Green or Blue, so you can mix and match for a look that feels just right.
