Product Description —

True to its name, the Roaring Fork is spread out in all four directions with a unique slide and a climber of its own. There are two easy-access stairways to mount the structure at two distant spots. At the top of one of these stairways is a fast-paced but safe 4-foot Tube Slide. The other two branches of the Roaring Fork have a 5-foot-tall Straight Slide each, offering a breezy ride down the deck. At the last and highest branch is a whopping 66-inch Spiral Slide that provides kids with a 360-degree view of the playground. The Fork also tests and polishes the climbing skills of kids with the curved and tilted Sea Creature Climber, Pixel Climber, and the vertical Pod Climber. Different activity panels are placed to ensure no kid is standing idle. Kids will have to lie down and crawl their way through at two points of the Fork, the thin Tube Bridge and the colorful Bones Tunnel. Musical instruments at the ground level also invite kids to experiment with sounds.
