NOTES

- ¹ This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching
- ² Showers: Product MUST be installed in accordance with current TCNA Handbook Stone Methods. The NSI recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations.
- ³ Please see NSI DSDM Guidelines for all installation instructions.
