MARBLE

**NOTES**

<sup>1</sup> This material is moderately sensitive to acids. When used as a kitchen countertop, acid etching may occur. Acid etching will be less visible on lighter stones and honed surfaces.

<sup>2</sup> Per MIA guidelines, fiberglass mesh backed slabs are not recommended for showers.

<sup>3</sup> May have fiberglass mesh backing, choose setting materials accordingly.

<sup>4</sup> Please see MIA DSDM (Dimension Stone Design Manual) for all installation instructions.

Mortar Note: The MIA recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations.

Note: Alternate finishes and thicker formats available on special order.

Calcites are extremely crystalline and subject to chipping during fabrication and normal use.
