# CARIBBEAN ISLAND SLAB

—

This white and translucent marble slab's creamy swirls are interspersed with islands of denser smoky quartz and occasional hints of rose. Available in 3/4" (2cm nominal) thickness with a polished, honed, or fluted finish.

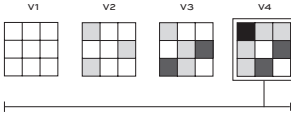

Shown in Fluted Finish

NOTES

[1] This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching.

[2] Showers: Product must be installed in accordance with current TCNA Handbook Stone Methods.

[3] Please see NSI DSDM (Dimension Stone Design Manual) for all installation instructions.

Tech notes: The NSI recommends installing resin-backed stone with epoxy-based setting materials or a combination of suitable primer and cement-based mortar. Consult your setting materials manufacturer for specific recommendations.
