

MINERVA GREY

A subtle, elegant marble, Minerva Grey is quarried in Greece close by the Nestos River. Its linear bands of pale oyster, silver, and pearl grey have a distinctly riverine flow. This stone's diffuse, crystalline colors subtly shift between warm and cool. Offered in 2cm (3/4") thickness, honed.

2cm Honed

NOTES

- ¹ This material is highly sensitive to acids. When used as a kitchen countertop, acid etching will be highly visible. Do not use this material if acid etching is a concern. For kitchen countertops we recommend a honed finish. Expect material to patina over time and create a beautiful rustic/antique look.
- ² The M.I.A. Recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations.
- ³ Please see MIA DSDM (Dimension Stone Design Manual) for all installation instructions.
