

SILVER ROOT

A mix of silver and gold, warm and cool that is subtly powerful. This marble from Turkey begins with a ground of softly silvered taupe, laced with fine strands of deep gold, almost as if they had been drizzled over the slab. Wider, bolder, more crystalline veins of charcoal grey ripple across the surface as well, with occasional inclusions that resemble a handful of black sand from a shell-strewn tropical beach. Silver Root is offered in 2cm, honed.

2cm Honed

NOTES
<p>¹ This material is highly sensitive to acids. When used as a kitchen countertop, acid etching will be highly visible. Do not use this material if acid etching is a concern. For kitchen countertops we recommend a honed finish. Expect material to patina over time and create a beautiful rustic/antique look.</p> <p>² Product MUST be installed in accordance with current TCNA handbook stone methods. The M.I.A. Recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations.</p> <p>³ Please see MIA DSDM (Dimension Stone Design Manual) for all installation instructions.</p>
