

WHITE SAND SLAB

White Sand is a beautiful beige Turkish marble with delicate tonal veining and a smooth background.
Stocked in a polished finish, White Sand is a solid neutral with interesting, light movement.

NOTES

¹ This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching.

² Showers: Product MUST be installed in accordance with current TCNA Handbook Stone Methods.

³ Please see NSI DSDM (Dimension Stone Design Manual) for all installation instructions.

Tech Notes: The NSI recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations. Epoxy fill on face of slab to be expected. High veining and tone variation, expect color spots on some pieces.
