## NOTES

<sup>1</sup> This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching.

<sup>2</sup> Showers: Product MUST be installed in accordance with current TCNA Handbook Stone Methods.

<sup>3</sup> Setting Material: Ardex WA Epoxy, Mapei Kerapoxy 410 and Ardex P4 Primer + Ardex X77 White Microtec Fiber Reinforced Mortar

<sup>4</sup> Please see NSI DSDM (Dimension Stone Design Manual) for all installation instructions.

Tech Notes: The NSI recommends installing resin-backed stone with epoxy-based setting materials. Consult your setting materials manufacturer for specific recommendations. Epoxy fill on face of slab to be expected. High veining and tone variation, expect color spots on some pieces.
