

# ARBOR

---

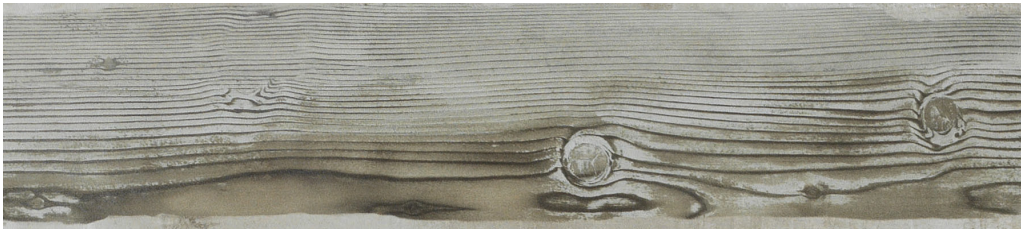

We're always looking for unique and special porcelains, and we found a great example in Arbor. This 4" × 14" non-rectified porcelain marries the appearance of cement with a wood-look effect that feels hand-painted. A wide variety of faces created in a special molding process give Arbor a handmade aesthetic that's unique among porcelain tiles. Arbor's relatively small format makes it a highly versatile porcelain, perfect for planking and herringbone patterns. Stocked in four understated earth-tone colorways.
