NOTES

- ¹ This material is moderately sensitive to acids. When used as a kitchen countertop, acid etching may occur. Acid etching will be visible on lighter stones and honed surfaces.
- ² Regarding Fiberglass Mesh Backed Stones for installation in wet areas, consult your fabricator for recommended installation method. Options include, but are not limited to complete removal of fiberglass mesh backing (where applicable) or installing with epoxy setting material. Any decision to install contrary to most current Marble Institute of America Dimension Stone Design Manual practices is solely at buyers discretion and risk.
- $^{\rm 3}$ If slab has fiberglass mesh backing, Mapei Kerapoxy 410 recommended.
- ⁴ Please see MIA DSDM (Dimension Stone Design Manual) for all installation instructions. Note: Alternate finishes and thicker formats available on special order.
