

# AELLA SLAB

Aella is a milky-white Greek stone unique for its soft taupe-brown veining. A warm, soothing neutral, this marble slab is stocked in a honed finish in 3/4" (2cm nominal) thickness.

**NOTES**

<sup>1</sup>This material is sensitive to acids including those commonly found in kitchens. Acid etching occurs in many stones, but may be less visible on lighter colors and on surfaces with a honed finish. A professionally applied surface treatment like MORE™ AntiEtch™ can prevent acid etching.  
<sup>2</sup>Showers: Product must be installed in accordance with current TCNA Handbook Stone Methods.  
<sup>3</sup>Please see NSI DSDM guidelines for all installation instructions.

Tech Notes: The NSI recommends installing resin-backed stone with epoxy-based setting materials or combination of primer + cement mortar. Consult your setting materials manufacturer for specific recommendations. Minor vein washout is possible in wet installations.
