

20' Straight Fabric Wall

The Straight Fabric Set Wall offers a versatile and vibrant printed fabric wall that will transform your broadcast set, event space, or trade show. Its 30mm aluminum tube frame construction is durable and lightweight, while the self-supporting design offers easy setup without the need for additional support. Stretch fabric graphics are hand-sewn, durable and dry-cleanable.

Connection Methods

Connection Method 1: TC-30-T

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 2: TC-30-90T

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 3: TC-30-X

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

Connection Method 4: TC-30-90B

Take the plastic connector and make sure the snap buttons are in proper position for the frame tube holes. Simply press the snap button with your thumb and carefully slide the tube onto the connector. The snap button should pop through. Some twisting may be necessary to assure the snap button has popped all the way through the tube hole. Do not force the connection and be careful with the tube edges, they may be sharp.

With the plastic connector in secured place, use the provided hex key for attaching the base plate with the M10 screw. Once the base plate is in the desired position, tighten the set screw.

Kit Assembly

STEP 1:

Gather the components to build the frame. Use the Exploded View for part labels.

Reference Connection Method(s) 1, 2, 3 and 4 for more details.

STEP 2:

Pull the pillowcase graphic over the frame and zipper it closed at the bottom.

STEP 3:

Attach the stabilizing bases to the bottom ends of the of the frame.

Reference Connection Method(s) 4 for more details.

STEP 4:

Set up is complete.
