## Dual Set

The Dual Set is a two-for-one solution that combines our Strong Set and Corner Set to create a multifunctional studio. Set up one side with one of our desks for news or panel oriented programming. Use the other side with seating or a round table to create a more casual and intimate atmosphere for conversational programming.

# Planning and Design

## Design Time

Our Planning and Design Service gives you one-on-one time with a designer to make your vision a reality. They work with you to dial in the details and then create 3D renderings. This provides the opportunity to try different looks before construction and means there are no surprises upon delivery.

In your quote Design is itemized by the day or week. One, 8-hour day of Design is \$1,152. This includes two rendered revisions per day of Design. Standard sets usually take one, 40-hour week billed at \$5,760. A week of design allows for up to 10 revisions.

Design services are cumulative. Your 8-hour day of design can span multiple business days. This gives you space to share renderings internally and make changes without any pressure.

## Planning and design includes:

- Zoom or conference calls to plan with your team.
- Communicating via Basecamp to easily share images, documents, and comments from project start to delivery.
- Reviewing your budget, studio size, and timeline. This includes reviewing blueprints and preliminary drawings.
- Determining studio usage—Will it be a news show, interview panel, or both? What are your studio's limitations and opportunities?
- Exploring what products you like or dislike. What look and feel do you want?
- Selecting materials and samples—we offer lots of options for colors, finishes, graphics panels, textures, and other features.
- Rendering a 3D model and make revisions to finalize the design.
- Documenting all the fabrication specifications for your approval.
- Talking with the shop to problem solve any build challenges and ensure the finished product reflects your design.

## Dual Set

The Dual Set can help maximize the space and efficiency of your studio. It provides a versatile set that can adapt to meet the demands of a diverse range of productions.
