Description

Aeons The Universal Rack Mount Cable Management is your turnkey solution for organizing cables in your server rack or cabinet. High quality SPCC Cold Rolled Steel with durable powder coating finish construction hold up to even the harshest industrial environments as a durable solution for easy installation and readily accessible. Available in 1U and 2U configurations, metal or plastic duct/cover, for horizontal or vertical installation.

Features**Professional and Added Value**

- The removable cover keep things organized and also prevent unwanted air circulation as well as dust from getting in.
- The use of cable management not only makes racks look neat and organized, but when installed properly they provide added structure support and controlling proper airflow.

Quality Construction and Equipment Security

- Metal parts made of SPCC commercial cold-rolled steel provide durable solution for your mission critical equipment installation.
- Precision injection molded plastic parts ensures form, fit and meeting performance requirements.

Easy installation and quick deployment

- Ready to mount with included mounting hardware to a standard 19-inch rack to help you organize cabling though covered cable duct.
- Removable cover makes it easy to add or remove bundled cables quickly.
- The duct offers series of fingers and path-through holes to help route cables and reduce cable stain in the application.
