

SESHA's innovative facial mask creates a CO2 environment that triggers a natural increase in oxygen to the treatment area, also known as the Bohr Effect, a concept inspired by the naturally carbonated hot springs. When creating an artificial excess of CO2 on the skin, the body must respond by delivering more oxygen through the blood to create a balance. Oxygenated skin leads to an increase in cell metabolism and collagen production, improved blood circulation, enhancement of product delivery, absorption, and a radiant, more youthful appearance.

SCIENCE

- Increased cell metabolism and collagen production.
- Increased hydration and plumping of the skin.
- Optimal product penetration and absorption of nutrients.
- Reduction in the appearance of pores and hyperpigmentation.
- Immediate skin tightening and firming.

Great for all skin types & tones.

"The Sesha Revive CO2 Facial can help to jump start the cellular function with a rapid infusion of oxygen. It's great for clients who have skin that is out of balance, suffering from transepidermal water loss, and who are dealing with skin laxity."

- Jenni Nagel (Lipgloss & Aftershave)

L+A Lipgloss +Aftershave

KEY INGREDIENTS

Magic C Complex Powder: L-Ascorbic Acid (Vit. C), Grape Seed Extract. Pure vitamin C combine with a naturally extracted grape seed extract which antioxidant property is 20 time stronger than vitamin C.

CO2 Infusion Gel: Aqua, Sodium Hyaluronate, Sodium Bicarbonate, Chondrus Crispus Extract, Hydrolyzed Chondrus Extract, Sclerotium Gum, Leuconostoc/Radish Root Ferment Filtrate.

Cotton Mask: Activator: Aqua, Cinnamomum Cassia Bark Ext./Poterium Officinal Root Ext./Zingiber Officinal Root Ext., Camellia Sinensis (Green Tea) Leaf Ext., Hibiscus Abelmoschus Ext., Saccharomyces/Podophyllum Peltatum Ferment, Leuconostoc/Radish Root Ferment Filtrate.

USAGE

STEP 1: In a bowl, mix Magic C Complex Powder with Activator until powder is dissolved

STEP 2: Separate cotton mask from plastic protective sheet

STEP 3: Fold cotton mask down to a small square that will fit in bowl

STEP 4: Place folded cotton mask in bowl to soak in Magic C Complex powder and Activator mix

STEP 5: Apply CO2 Infusion gel all over face or desired treatment area while mask soaks

STEP 6: Place soaked mask on face or desired treatment area and leave on for 10 minutes.

Due to the acidity and CO2 bubbling reaction, a tingling and burning sensation is normal for the first 1-2 minutes.

TIP: You may use an ultrasound device over mask to penetrate product even deeper into the skin
