

The Comprehensive Cleansing Program™

When working with health concerns such as SIBO or other digestive issues, inflammation, chronic infections, including Lyme and other complex challenges, practitioners often recommend the Comprehensive Cleansing Program™

The program contains a 2-month supply designed to work in synergy to balance and repair the GI tract, as well as support systemic detoxification. As nutritional support, these formulas help to address biofilms and promote a healthy immune response in addition to the benefits of broad-spectrum anti-microbial botanicals. Combined with a healthy diet, this program is perfect for those wanting to feel and see lasting changes, such as better energy, decreased pain, and resolution of digestive complaints. The program is a 15% savings over the total cost of individual products.

PROGRAM INCLUDES Choice of 2 Biocidin® in either 1oz liquid, 90 caps or 1.7oz liposomal form, 2 Proflora®4R, 3 G.I. Detox™+, 3 Olivirex®, 1 Biotonic™, **plus as a bonus a FREE bottle of Dentalcidin™ toothpaste** to promote oral health.

-Dr. James Roach, MD.

"I never travel without Biocidin®, and recommend it often for children at True Health Medical."
-Dr. Anju Usman Singh, MD.

"... Now when I see a client report with elevated markers for mold exposure in the urine, I recommend G.I. Detox™+ I have seen that it is very effective and is much less expensive than the alternatives. I am a huge fan!" -Dr. Jill Carnahan, MD

"Dentalcidin™LS appears to be a wonderful adjunct in the treatment of periodontal disease and cavitation surgery in my dental practice. This statement is based on actual controlled pilot studies that I have performed clinically in my office. Based on these studies, I am having patients rinse with Dentalcidin™LS after brushing with Dentalcidin™ toothpaste, and would highly recommend it for anyone concerned about oral health." -John A. Rothchild, DDS.

"We have studied many possible treatments for Lyme at our research facility in Europe, and this is the most promising natural candidate. Both the Liposomal format and liquid version were tested. I think that our research supports the clinical feedback from physicians like Dr. Richard Horowitz, MD. These formulas are a breakthrough as support in Lyme disease, and should be considered a valuable addition to our integrative approach." -Dr. Leona Gilbert, Ph.D.
