

PROBIOTIC SAFELY SUPPORTS
INFANT'S NEEDS

Ther-Biotic® for Infants

A multispecies probiotic formula
to meet the special needs of infants†

This hypoallergenic blend of 5 *Lactobacillus* and 5 *Bifidobacterium* species is designed to safely meet the metabolic and intestinal support needs of infants and young children. All species in Ther-Biotic for Infants produce predominantly the L(+) isomer of lactic acid that can be safely metabolized by infants. Ther-Biotic for Infants is designed to support a normal infant microbiota that can be easily disrupted by cesarean section delivery, formula feedings, antibiotics, toxin exposures, or a variety of other factors.†

Supports normal maturation of an infant's GI and immune system†

Microbial colonization of the gastrointestinal tract, vital for normal gastrointestinal and immune system development, begins at birth. However, this process can be disrupted by cesarean section delivery, hospitalization, formula feeding, antibiotic use, and various exposures.† If an infant is breastfed, a maternal diet lacking in fresh fruits and vegetables can also affect microbial colonization. Ther-Biotic for Infants offers select probiotic species that support neonatal microbiota balance and healthy GI and immune system maturation.†

Protects microbial balance†

Ther-Biotic for Infants provides a blend of 10 different probiotic species. Research has shown that diverse probiotic strains are able

to favorably shift the balance of gut microbiota towards more beneficial species by competing for nutrients and adhesion sites, producing compounds such as organic acids, hydrogen peroxide and bacteriocins, and stimulating the body's own healthy immune response.†

Supports healthy immune response†

Ther-Biotic for Infants supplies five essential *Lactobacillus* species critical for healthy development of the infant immune system and dendritic cell differentiation. The five *Bifidobacterium* species provided are normally predominant in the neonatal microbiota and help enhance innate immunity and support healthy immune response.†

Designed for an infant's unique needs†

An infant's gastrointestinal tract is not fully mature and cannot metabolize the D(-) isomer of lactic acid produced by certain *Lactobacillus* species often found in adult probiotics, such as *L. acidophilus* and *L. reuteri*. Ther-Biotic for Infants contains *Lactobacillus* species that predominantly produce the L(+) isomer of lactic acid, the safe form for an infant's metabolism.

- Formulated for infants up to 2 years
- Easy to administer powder formula
- Free of D(-) isomer of lactic acid-producing species

Ther-Biotic® for Infants

A multispecies probiotic formula to meet the special needs of infants†

Indications

Ther-Biotic for Infants is intended for daily use to provide a broad spectrum of beneficial *Lactobacillus* and *Bifidobacterium* probiotic species for maintenance of GI and immune function in infants and young children.†

Formula

SUGGESTED USE: For children over 12 months: 1 scoop, once or twice daily. For infants 6 to 12 months: 1 scoop daily. Mix product in infant formula, milk, juice, or sprinkled on food such as yogurt, apple sauce or cereal, or as recommended by your healthcare professional. For breastfeeding mothers, product can be added to expressed milk, or small amounts at a time can be dispensed by placing on nipple or finger.

Supplement Facts

Serving Size 1 Scoop (Approx. 0.5 gram) • Servings Per Container 120

Amount Per Scoop	% Daily Value
Proprietary Probiotic Blend (5 billion CFU)	500 mg
Lactobacillus species 2.5 billion CFU	150 mg
in a base of inulin (derived from chicory root)	
<i>Lactobacillus rhamnosus</i>	*
<i>Lactobacillus casei</i>	*
<i>Lactobacillus paracasei</i>	*
<i>Lactobacillus gasseri</i>	*
<i>Lactobacillus salivarius</i>	*
Bifidobacterium species 2.5 billion CFU	350 mg
in a base of inulin (derived from chicory root)	
<i>Bifidobacterium infantis</i>	*
<i>Bifidobacterium bifidum</i>	*
<i>Bifidobacterium longum</i>	*
<i>Bifidobacterium breve</i>	*
<i>Bifidobacterium lactis</i>	*

*Daily Value not established.

Other ingredients: None.
