

INTENSITY™ IF COMBO II

The InTENSity IF Combo II combines TENS and Interferential waveforms in one sleek rechargeable design. Equipped with preset body-part-specific settings, the InTENSity IF Combo II intuitively guides the patient step-by-step to ensure the ideal therapeutic treatment throughout the healing cycle.

Simply choose a preset program by body part or customize a program to meet your specific therapy needs. With the powerful rechargeable lithium ion battery, this portable device can be used at home, at work or on-the-go.
