

## POLARIS RZR 170 BILLET LOCKNUTS

[www.lsracing.com](http://www.lsracing.com) 1-800-4LS-Race

Thank you for purchasing Lonestar Racing's billet double pinch locknuts. These locknuts install in place of the 2 factory hex style locknuts providing you an easier more efficient way of tightening your axle and hubs to the vehicle. Please note that you must retain the factory steel spacers as seen in the pictures below. It is also recommended to put a small amount of anti-seize on the axle threads before installing the locknuts to protect the threads. Tighten the locknuts against the hubs by hand. Then using the supplied tool give them another ¼ turn. Next tighten the two pinch bolts in an alternating pattern until snug. Make sure to recheck the locknuts after approximately 15 minutes of the first ride. Periodically check locknuts during normal maintenance.
