Note: These colors are intended to show the approximate color of our plaster finishes. Color will vary based on the type of finish selected, sealers and level of polish. Variation in color due to varying products, weather, job conditions and method of application should be expected. For color verification, you can request an actual sample in the color and texture prior to ordering material. 5 Star Finishes Ltd is not responsible for color correctness of applied finish. Color must be verified and approved by the owner prior to application.

Venetian Plaster Color Chart

Venice, Italy is famously called “*the city of canals*”.

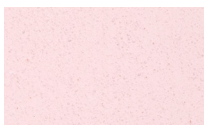

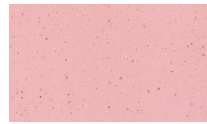

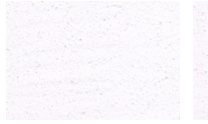

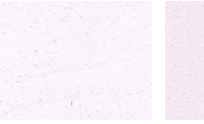

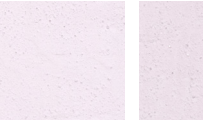

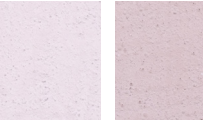

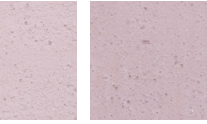

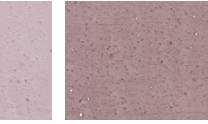

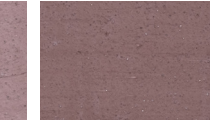

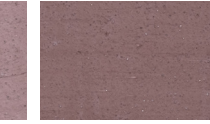

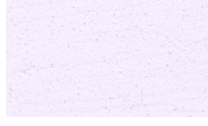

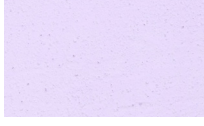

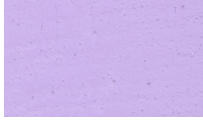

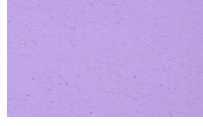

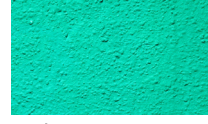

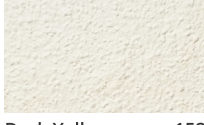

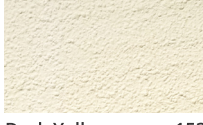

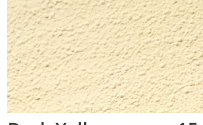

Uniquely situated over one hundred small islands in a lagoon of the Adriatic sea, the architecture there is able to withstand the exceptionally wet and damp conditions due to the utilization of lime plasters. The Egyptian Pyramids and many ancient temples were also fashioned with limestone. The plaster is created using a natural process of first heating the limestone, to release carbon dioxide. It is then placed into water, forming a lime putty which may be mixed with linseed oil and various aggregates such as crushed marble grains. The putty is worked into surface coatings of virtually any color, texture, and sheen, which can be applied to any interior or exterior surface. This results in **seamless, marble-like sheets of plaster**.

The Venetian Plaster Benefits:

- Great alternative to paint and wallpaper
- Incombustible alternative for fireplaces
- Low thermal conductivity
- Highly flexible
- Highly customizable
- Vapour permeable
- Long lasting durability
- Resistant to fading
- Wash and scrub resistant
- Absorbs structural movements
- Withstands thermal cycles
- Highly resistant to mold and mildew (ph 12.4)
- Insect/pest deterrent (highly alkaline)
