We manufacture custom plasters and source any plaster from around the world for architectural specs. Our custom plasters are designed from raw materials to create a mixture that will match the vision for your brand image. The formulations of aggregates, additives, powders, colorants and binders will be adjusted to suit the specific needs of your project. We are the only company in Canada providing these unique, custom finishes.

# Microcement Color Chart

## About Microcement

The latest global trend in floor and bathroom design is Microcement, which is thinner than a polished concrete overlay and significantly lighter than most other options. Microcement appeared and became very popular in France when Dimitri Koubi began applying it in 2008 under the name “**Beton Cire**”, meaning *waxed concrete*.

Microcement is laid 2-4 mm thick, is waterproof, impact resistant, and easy to clean. As a continuous coating, there are no joint lines that can harbor debris (dirt, bacteria) like a tile grout line. A non-slip aggregate on the sealer coat may also be applied. This plaster can overlay tiles, so long as they are secured to their substrate. This provides an easy method of changing flooring or a bathroom area without demolition. The overlays are designed to be used on horizontal and vertical areas, both inside and outside and can adhere to most existing substrates, as well as new wood, cement board, terrazzo, marble, concrete, stone, etc. Strong and versatile, we have used it in on floors, columns, feature walls, bathroom stalls, fireplaces, backsplashes, and other special features in businesses and homes. Using design patterns (tape, custom stencils, etc) we can create an impressive, durable and unique brand image in a floor or on a feature wall.

Recommended for commercial and residential shower walls, ceilings, fireplaces, backsplashes etc. **This product replaces the need for tiles.**

## The Microcement Benefits:

- Thinner than polished concrete overlay
- Light in weight
- Waterproof
- Impact resistant
- Easy to clean
- No Joint lines
- Can overlay tiles without demolition
- Adheres to most existing substrates
- Strong and versatile

## Microcement is Suitable for:

- Horizontal and vertical areas
- Indoor and outdoor
- Commercial and residential
- Floors
- Ceilings
- Columns
- Feature Walls
- Bathroom Stalls
- Fireplaces
- Backsplashes
- ... and more!

### 5 Star Finishes Offers Three Different Microcement Lines all Rated for Interior and Exterior Usage.

**Microcement Wall and Shower** is designed for ease of use on vertical surfaces, whereas our **Microcement floor** is extremely durable and spreads easily on horizontal surfaces. Our last product is **Microcement Synergy** which is thin, aggregate free and allows for seamless floors and walls to be created without any lap lines or unsightly ‘cold joints’.

**With a wide range of primers, sealers and Microcement we have everything necessary for any project.**

Note: These colors are intended to show the approximate color of our plaster finishes. Color will vary based on the type of finish selected, sealers and level of polish. Variation in color due to varying products, weather, job conditions and method of application should be expected. For color verification, you can request an actual sample in the color and texture prior to ordering material. 5 Star Finishes Ltd is not responsible for color correctness of applied finish. Color must be verified and approved by the owner prior to application.
