

**How to  
build a  
weekend cabin  
in five  
minutes,  
or less...**

**PLAN 680-681**

# Set up a Coleman Valley Forge 680...

And relax. You're in the heart of easy living country. And you're right at home, wherever you go in the great outdoors.

The Coleman Valley Forge 680 actually sets up in five minutes or less. First time out. It's the camping trailer that's big on comfort. And as versatile as it is easy to handle. Here's the perfect trailer for a family of four to six persons . . . with many of the same luxurious features of the big Coleman Brandywine 690.

Take your choice of interior design: the Valley Forge 680 (with kitchen) or the Gettysburg 681 (without kitchen). Both have a whopping 124 square feet of living space.

Once you spend a weekend in the Valley Forge 680, you'll never go back to the old-fashioned cabins. You get all the sounds, the smell, the feel of the great outdoors (only without the bugs). You're still camping, but with all the comforts of home.

Compare a Coleman camper with any other brand, on the road and in the campsite. Feature for feature, you'll quickly discover the difference. In design. In construction. In livability.

Two-speed cranking makes set up easy even for the lady of the house, or the kids. Wing beds roll out on self-lubricating wheels that can't stick or jam. Self-storing stabilizers on every corner keep you securely docked.

And when it's time to pack up and move out, you'll be amazed how quickly you get ready for the road. Take-down is just as easy as making camp. It all adds up to more time enjoying your vacation cabin. Less time working on it.

Take a close look at the Coleman craftsmanship. Like permanently hinged tufted vinyl dining seats, portable dining table, vinyl windows in front and back, acrylic nylon mesh screening, and double layer canvas-lined vinyl over the wing beds.

Then there's acrylic-lined washable draperies, portable storage bins under the dinette seats, and retractable door step that swings up over the aluminum door and locks. It all adds up to carefree camping. That's the Coleman concept.

More on the inside details later. Now let's take a look at the Coleman features—outside:

**FRAME** —there's a difference you can see. Heavy walled rectangular tubing and welded one piece construction give Coleman the sturdiest frame on the road.

**COUPLER** —as strong as the frame because it's welded to the frame. And Coleman's lighter tongue weight means you don't need a big, costly car hitch.

**WHEEL SUSPENSION** —designed like that on luxury cars to reduce road shock. Look for independent torsion bar suspension on both wheels.

**AXLE** —built to carry 30% more weight than fully loaded trailer weight. Attached directly to the frame and stressed for extra strength. Here's Coleman's important attention to detail.

**TIRES** —5.30/4.50 x 12 high quality tires are standard for proper strength and traction over any road.

**PROFILE** —low towability (just 47") means a better rear view and easier handling on the road. Coleman replaces the sway back silhouette with perfect balance.

**TONGUE JACK** —cranks quickly for trailer leveling and hook-up. Swings out of the way for road travel. It's easy with Coleman.

**TWO-SPEED CRANKING** —easy-turn center crank makes set-up easy for your wife, or even the kids. Crank left of center takes half the time.

**TRAILER BODY** —pre-painted aluminum to resist rust or corrosion. Rides light. Stays in shape. And looks great.

**WING BED ROOF** —canvas-lined vinyl overhead simply won't leak, no matter what the weather. And there's no condensation build-up. You stay high and dry, all the time.

**CANVAS SIDES** —give you that great camping feeling you just can't get from any other kind of trailer.

**WINDOWS** —extra big to give you all the scenery, all the sounds, all the freshness . . . but none of the bugs. Close-knit nylon screens make sure you get just that part of the outdoors you want.

**DOOR** —full height aluminum door is self-storing, closes securely. And stays closed. Compare the design with any other.

**TOP** —ABS polymer material with heat-resistant acrylic laminate. Here's an insulated one-piece seamless roof that's leak-proof, sun-proof, and good-looking.

Starting to understand why so many new trailer buyers decide on Coleman? Wait till you get inside. There are plenty more good reasons. Have a look —inside:

The Coleman logo is located in the bottom right corner of the page. It consists of the word "Coleman" in a white, stylized, sans-serif font, set against a red, rounded rectangular background. A small registered trademark symbol (®) is positioned to the right of the word.

LIVING SPACE—6'2" width, 19'4" length . . . 124 square feet of living space, with a full 6'5" height. Perfect for a family of six.

DINETTE TABLE—great to gather 'round at meal times. Removable so you can also use outside.

FABRICS—you don't need to sacrifice fashion for wearability. With Coleman you get both. Bed cushions are vinyl, scotchguarded on one side. Seat cushions are soft, foam backed, tufted vinyl.

KITCHEN (In Valley Forge 680 only)—flips up for cooking, down for travel. Includes colorful high-fired porcelain three-burner range and kitchen sink. There's an exterior hook-up for city water supply, built-in 10 gallon water tank.

CABINET SPACE—there's 59 cubic feet of cabinet storage (28 cu. ft. in Gettysburg 681). With doors that stay tightly closed.

WING BEDS—roll out easily on self-lubricating nylon wheels. A full 51" wide. And as comfortable as 3" of urethane foam.

110 VOLT OUTLET (with circuit breaker)—25-foot power cord lets you hook into campsite current for added convenience. Meets all new RVI standards code for camping trailers.

COOLER—(Valley Forge 680 only)—like a 76 quart, self-defrosting refrigerator. Keeps its cool, with no work for you.

IMPROVED STEP—built extra-strong where some trailers are weak. This one takes even the heavyweights in stride.

STORAGE BINS—(Valley Forge 680 only)—2 large bins accommodate all kinds of camping or travel gear. Then tuck away out of sight.

COLORS—blended so fabrics, floor coverings, counter tops, sink and range ensemble all complement each other. Color coordinated draperies add just the right touch for the homemaker.

Draperies and privacy curtains—practical, cheerful, color-coordinated.

When the trailer's a Coleman, you can always count on easy living. You'll see.

and live happily ever after—anywhere in the great outdoors.

# Add to your easy living pleasure

**CANOPY**—here's a simple way to expand your vacation home. The Coleman canopy attaches directly to the trailer as a big 9' x 7' leak-proof addition. You get a full 6'3" of headroom. Lock-O-Matic poles, rope and stakes secure the canopy against wind

stress. Pull up an easy chair. And relax on your own private covered patio.

**CABANA**—a handy addition, wherever you go. The Coleman cabana is completely private. You can use it as a bathroom, clean-up room, dressing area, or for storage. It's all canvas, won't leak in even the wildest rainstorm. Just another convenience feature you'll be glad you chose.

**HEATER**—nothing can take the place of the big Coleman 9,000 BTU LP gas heater on those crisp spring and fall mornings. It's called the Solar Mite, and it keeps your trailer as comfortable as your own house. A special feature is Uni-Seal combustion, which separates combustion air from heating air. That leaves you only pure, fresh air inside.

**SPARE WHEEL, TIRE, TIRE MOUNT, AND TIRE COVER**—all accessories you'll want to consider for their convenience and margin of safety. The spare

wheel makes changing a flat a breeze, on the side of the road or in your campsite. Keeping a fresh tire on hand is just good sense, especially on the long hauls. The spare tire mounts directly on the trailer, tucked up front out of the way. And an attractive Coleman cover makes the package complete.

**TRAILER SLEEPING BAG**—here's color-coordinated "instant bedding" . . . built to fit the trailer mattress size exactly. Perma-press sheet liners snap out for washing.

## SPECIFICATIONS

*The following equipment and measurements are standard on the Coleman Valley Forge 680 and Gettysburg 681:*

torsion bar suspension  5.30/4.50 x 12 tire size  hub caps  tongue jack  safety chains (2) and 1 7/8" ball coupler  interlocked steel frame  woodlife treated floor  trailer size, closed—6'8" wide x 12'6" long  trailer size, open—6'8" wide x 19'4" long  sandalwood and chocolate prepainted aluminum body  double wall insulated polymer hard top  step door  extruded aluminum screen door with color matching solid panel  floor area—6'2" wide x 8'8" long  interior—124 sq. ft. living space  cabinet storage, 59 cu. ft.
