1995 FOUR SEASONS SERIES

GENERAL INFORMATION BULLETIN GB:94-10

October 14, 1994

SUBJECT: 1995 FOUR SEASON SERIES HYDRAULIC LIFT SYSTEM

Nature of change: Heavier 5/16" diameter pulley retaining pins

Affected models: All 1995 Yosemite and Hatteras folding trailers

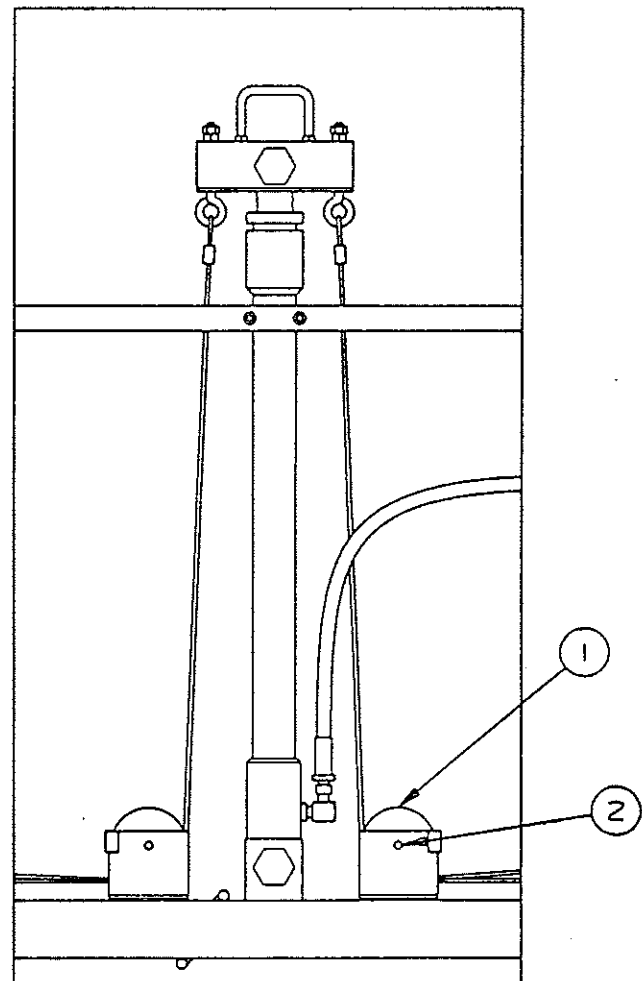

As you know, the hydraulic lift system on Four Season series trailers has undergone a number of design enhancements. These previous enhancements were brought to your attention through Product Enhancement Bulletins PE:94-1, dated February 24, 1994 and PE:94-2, dated August 10, 1994. Please take the time to review these.

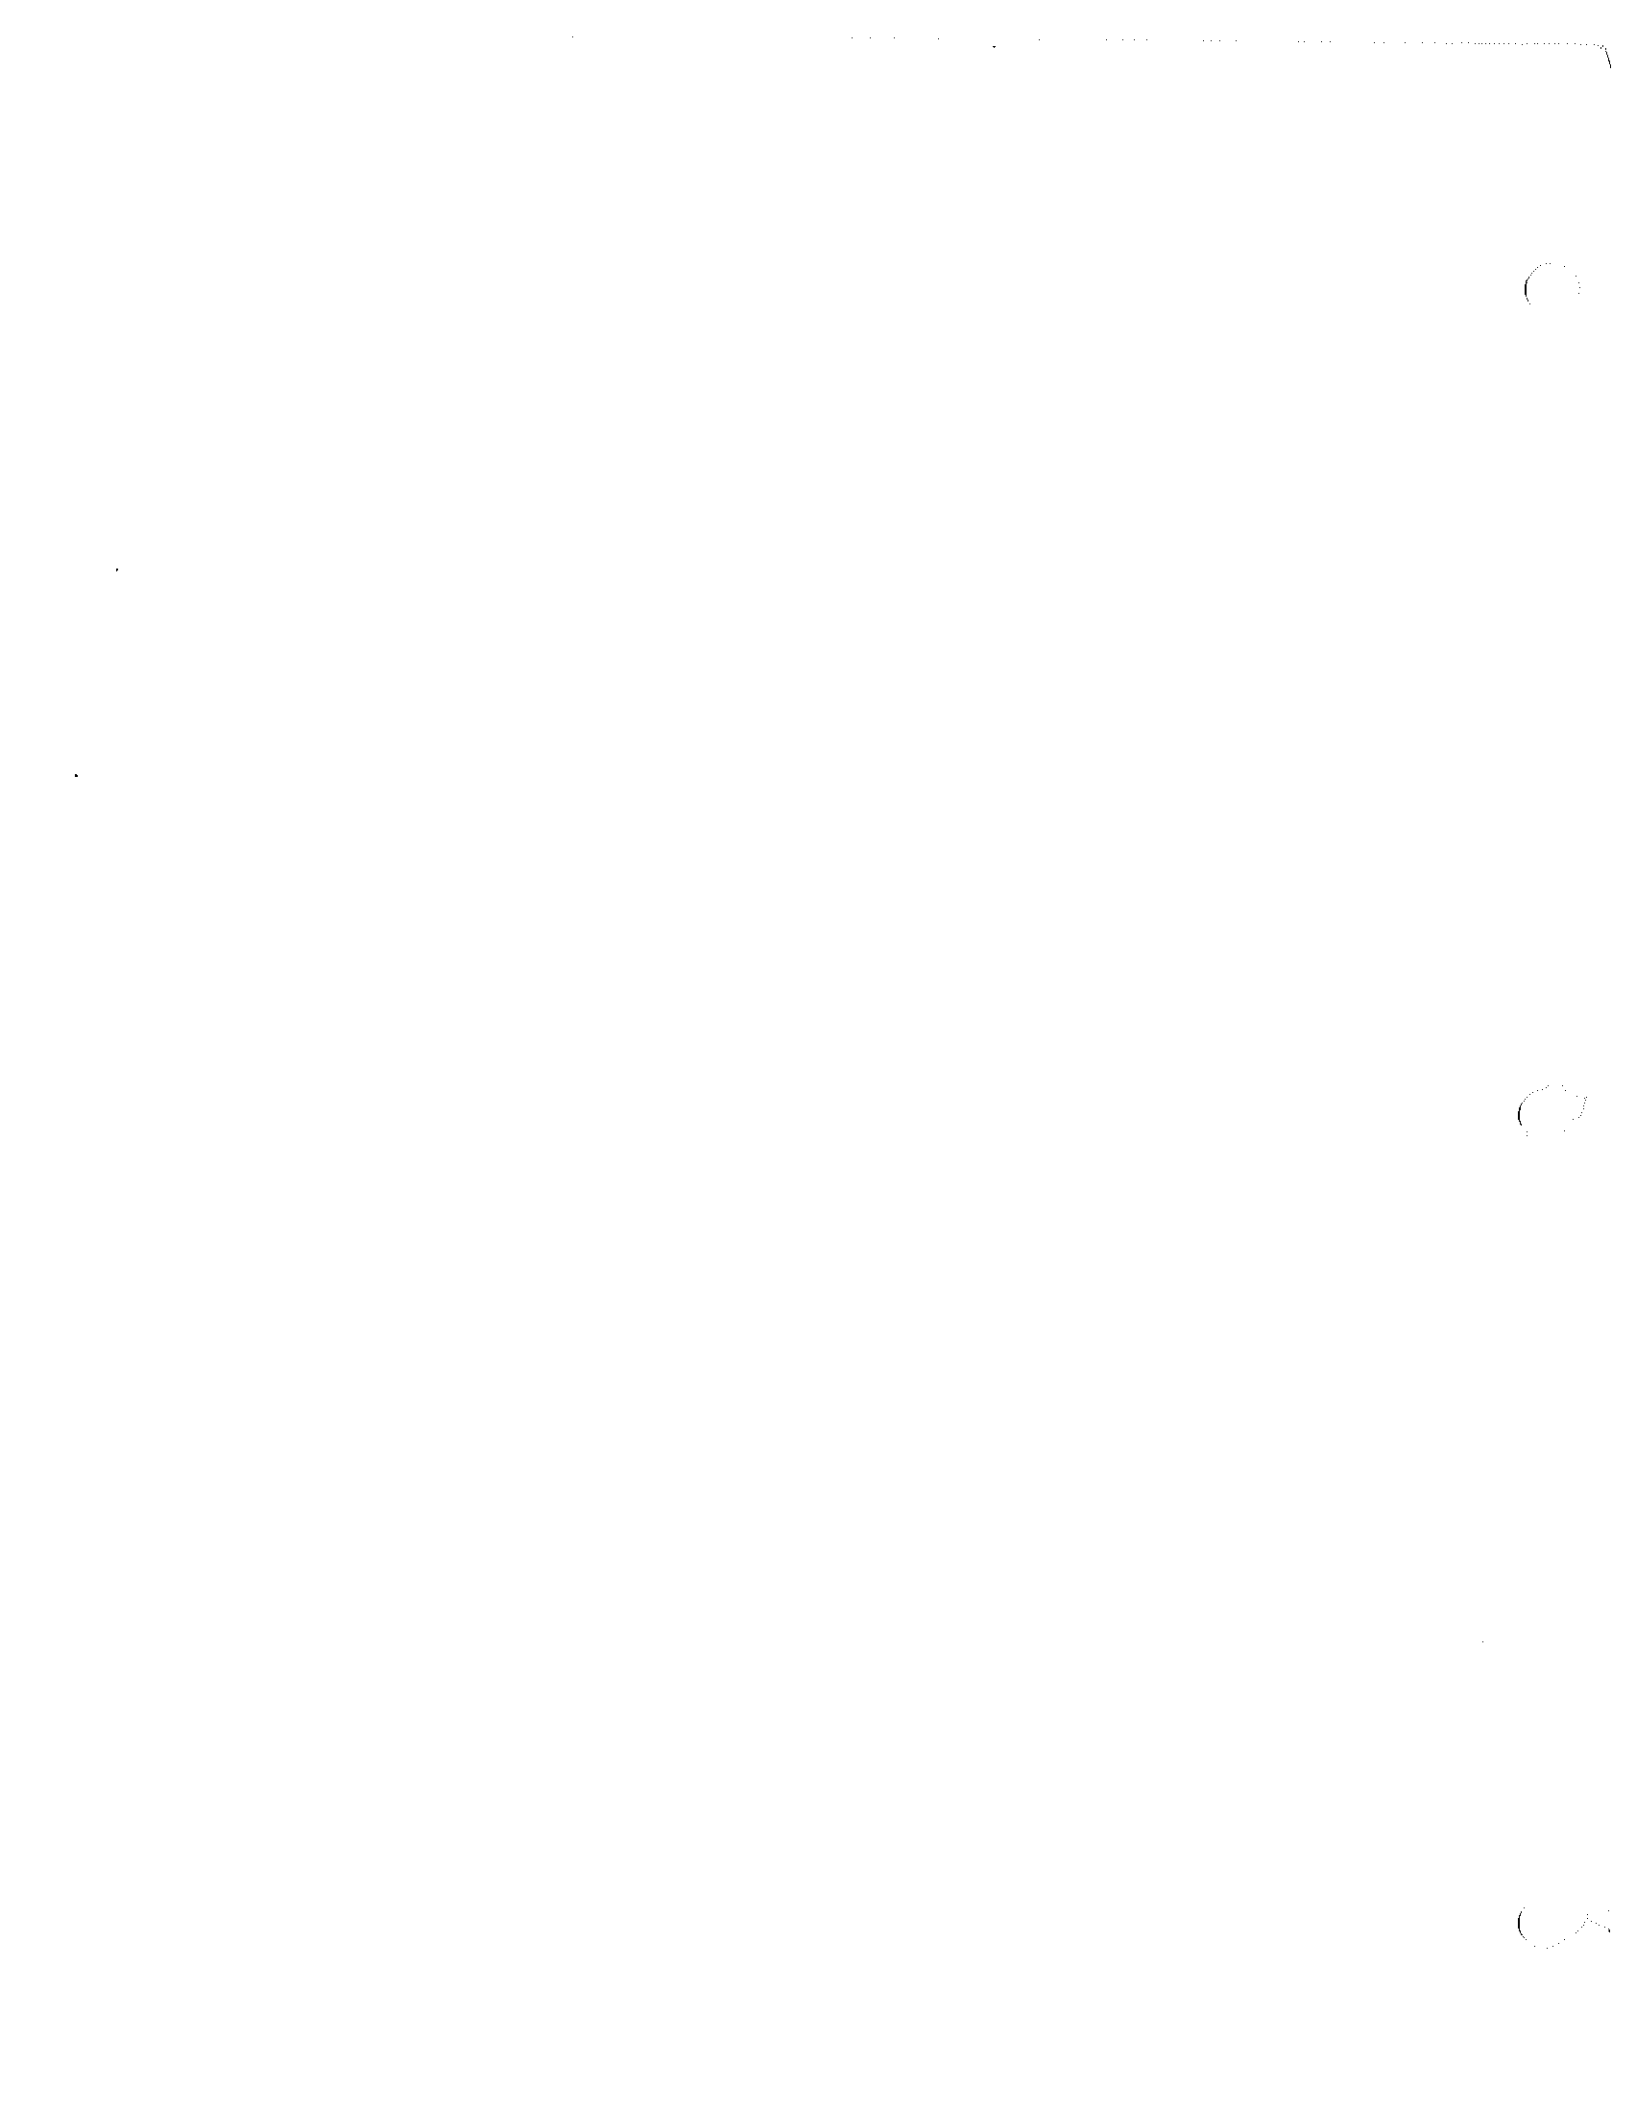

With the implementation of these two previous enhancements, the lifting capability of the hydraulic system has increased. Therefore, a precautionary measure increasing the diameter of the pulley retaining pins has been instituted. This change affects all four pulley clusters. Two clusters are located each side of the hydraulic cylinder. (The figure shows only the two pulley clusters at the base of the hydraulic cylinder.)

Part numbers for the larger diameter pulley retaining pins and pulleys are as follows:

- Item #1. 4751A5491 - 5/16" pulley and bearing assembly
- Item #2. 4720K1561 - 5/16" pulley retaining pin with cotter key

This design change does not affect Americana series trailers which have been upgraded to 1 1/2" hydraulic cylinders, i.e. larger reservoirs for air conditioner installation. The reason being that Americana series trailers are not restricted by the additional weight of two hard sides while raising the top assembly. Please ensure that all parts and service personnel are aware of these changes.

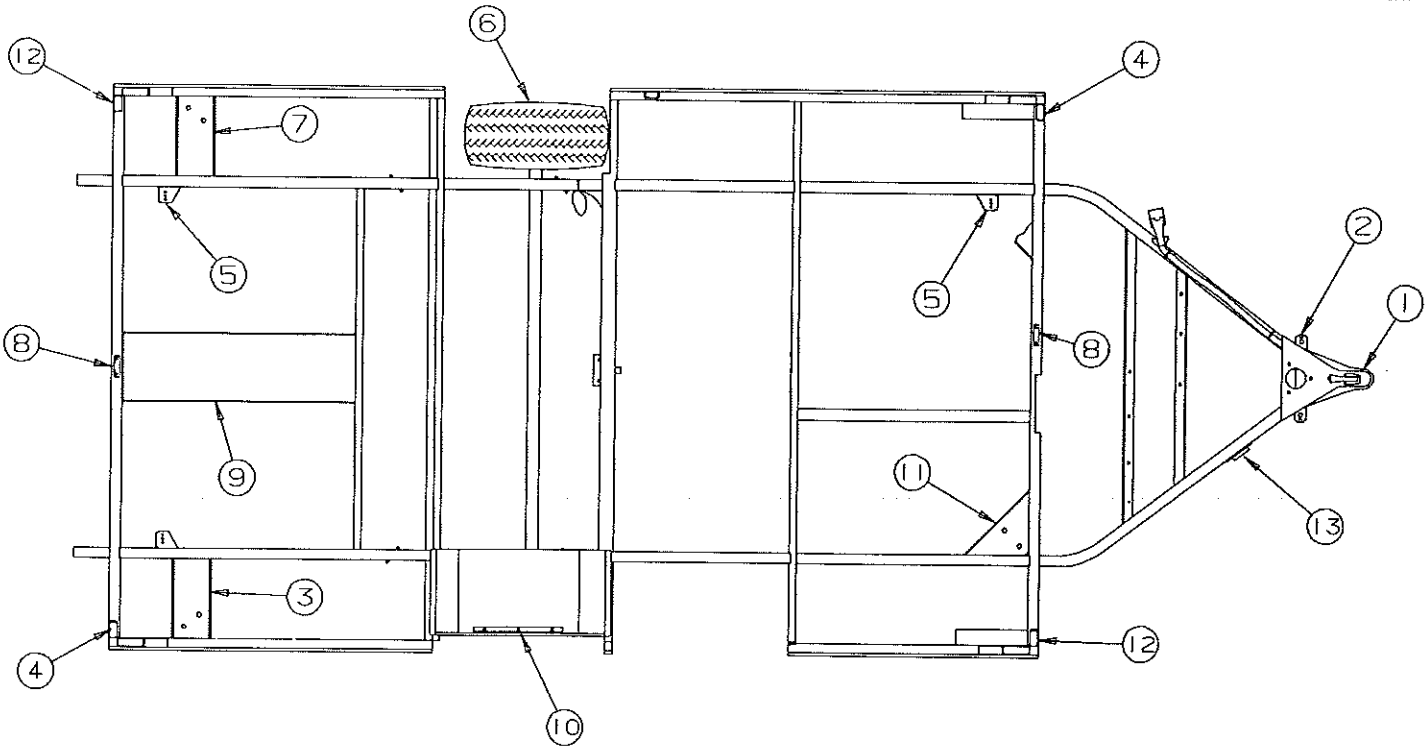

REPAIR PARTS

HYDRAULIC TRAILER FRAME ASSEMBLY COMPONENT PARTS
NOTE: Refer to Page 22, 23 for Hydraulic Pump & Components

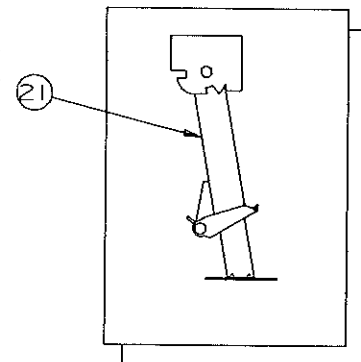

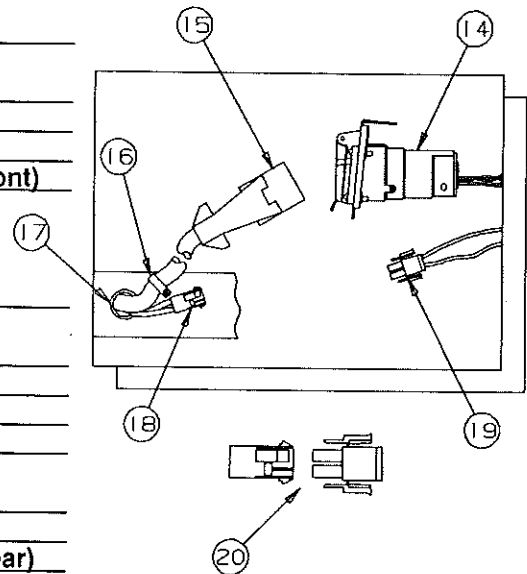

CODE	PART NO.	DESCRIPTION
1	4742-2001	2" Coupler assembly
	4714A2211	2" Coupler repair kit
2	4748-6611	Chain bar w/pins
3	4751-8451	Battery box w/straps (plastic)
