GENERAL INFORMATION BULLETIN GB:94-11

October 14, 1994

SUBJECT: 1995 PIONEER AND FOUR SEASON SERIES UPPER CRANK AND SPROCKET ASSEMBLIES

Nature of change for 1995 Pioneer series trailers:

Addition of one 1" solid shear pin and one 1" spiral shear pin into the manufacture of the upper crank and sprocket assembly

Nature of change for Four Season series trailers:

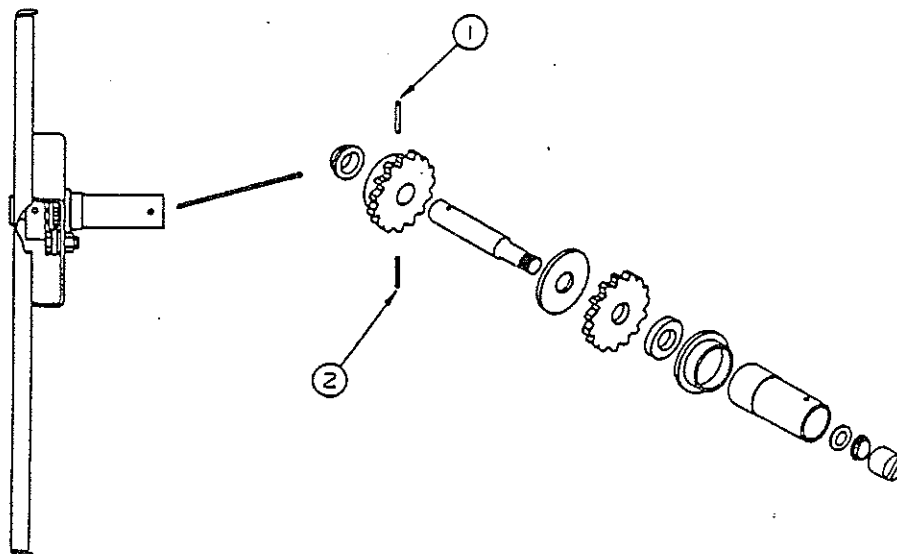

Addition of one 1" solid shear pin and one 3/4" spiral shear pin into the manufacture of the upper crank and sprocket assembly

Affected models: All 1995 Pioneer Series trailers - Arcadia, Avalon, Chesapeake, Chesapeake CP, and Columbia models (U.S. and Canadian) and 1995 Four Season Series Cape Cod model only (U.S. and Canadian)

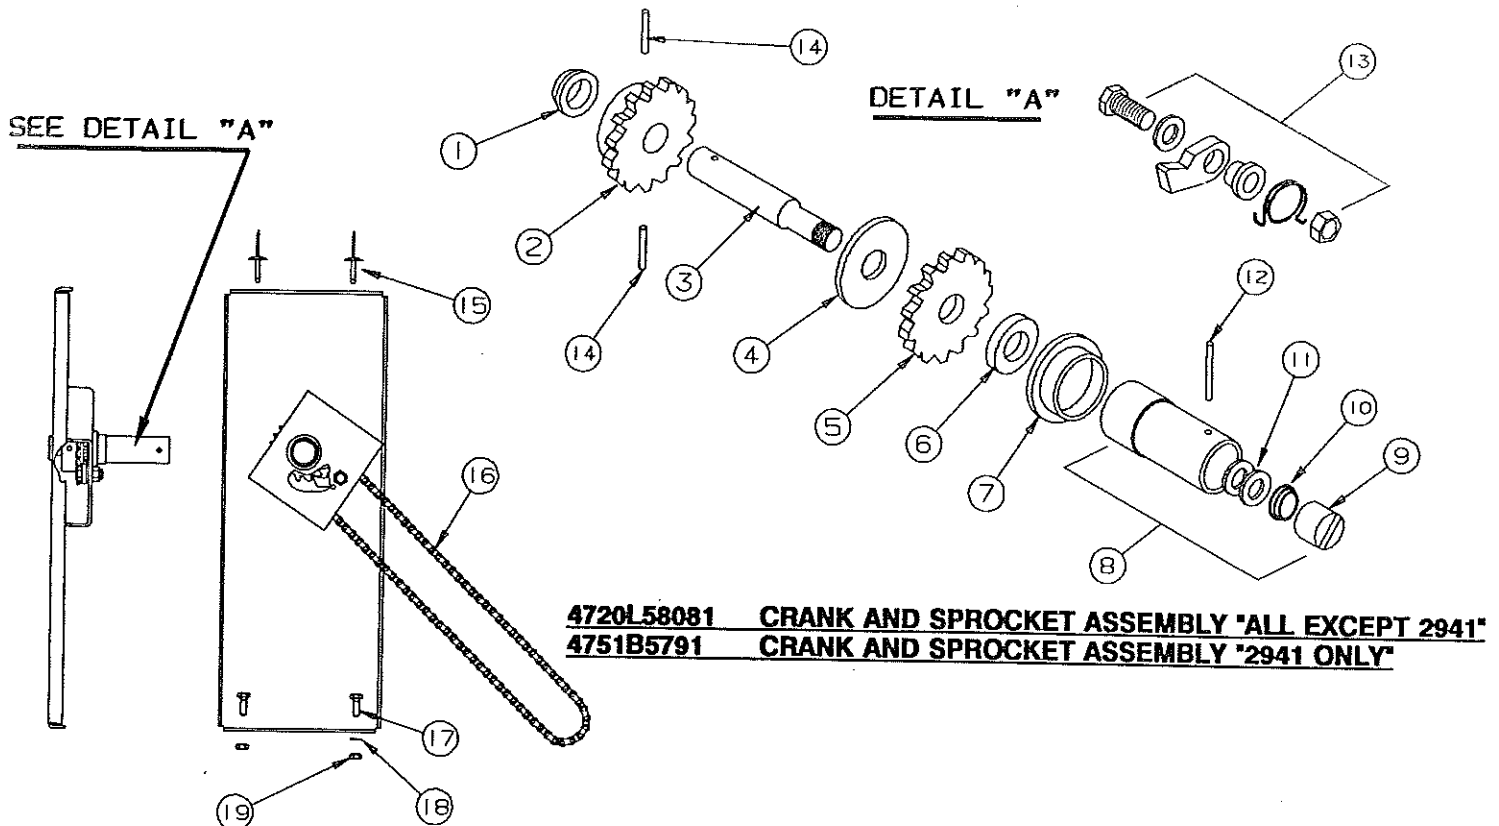

Introduction of the 1995 Fleetwood Folding Trailer product line revealed a new crank-up/crank-down lift system. Variations of the crank-up/crank-down lift system are found on Destiny, Pioneer, and Four Season series trailers.

The purpose of this bulletin is to advise your service technicians of a recent manufacturing change to the crank-up/crank-down lift system on Pioneer and Four Season series trailers. In particular, the upper crank and sprocket assembly. This lift system component part encases the crank-up/crank-down clutch mechanism behind the ABS front or rear body panels. (Refer to figure.) Modifications to this part include the addition of one solid (item #2) and one spiral shear pin (item #1) into the toothed chain sprocket. This alteration decreases the potential shearing capacity of the pins.

All Pioneer series trailers manufactured after September 5, 1994 will have incorporated the solid/spiral shear pin configuration and all Four Season series trailers manufactured after October 3, 1994. The replacement part number for the 1" solid shear pin is 4744A1301 and 4720D1481 for the 1" spiral shear pin. The replacement part number for the 3/4" spiral shear pin is 4752-4391.
