E4

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this trailer when fully loaded. It includes all weight at the trailer axle(s) and tongue or pin.
- All dry weights are based on the standard model and do not include optional accessories.
- Maximum Carrying Capacity is determined by subtracting Gross Dry Weight from the GVWR. The Maximum Carry Capacity does NOT include the weight of fresh water, propane, or water in the water heater.
- Trailer open width includes slide-out step and/or slide-out.
- Water weight equals 8.3 lbs. per gallon. Propane Gas weight equals 4.2 lbs. per gallon.
- Hitch weights are dependent upon how the trailer is equipped with accessories, on board cargo and tank fluid levels. Actual hitch weights may be higher or lower than shown. It is recommended that the tow vehicle and hitch for your trailer have sufficient capacity to accommodate actual usage.
- Some accessories may be dealer installed.
- Installed accessory weights will decrease the cargo carrying capacity. Consult Owner's Manual for accessory weights.
- Storage trunk models equipped with hot water have reduced cargo capacity because of hot water heater location.
- Refrigerator, furnace, cassette toilet, hot water and outside shower are factory installed accessories.
