Revised January 2005

HELPFUL HINTS ON SHOWER CURTAIN INSTALLATION

It is likely that you may replace your camper's shower curtain during your ownership of the camper. The shower curtain that came with your camper is a "universal" size and shape (rather than being a custom size and shape) and therefore can be easily replaced with a store-bought curtain.

The following installation recommendations will provide a convenient and effective shower enclosure.

ILLUSTRATION A

Recommended location of shower curtain opening, shower hooks, and shower rod straps.

ILLUSTRATION B

The shower curtain can be left to hang freely into the shower pan as in illustration B1, or can be tucked into the corners above the potty as in illustration B2.
