This kit is for use on all 1999 through 2001 model year trailers only.

This package contains:

1 - 4746C900 Battery pan
1 - 4749B553 Wire harness
4 - 4738A089 Bolt
4 - 1201E603 Lock nut
4 - 1200B126 Hex bolts
4 - 1202B043 Washers
2 - 4755A175 Battery bracket
1 - 4755-859C Battery connect label
1 - 4757-878 Connection decal

IMPORTANT NOTICE

These instructions are for the use of qualified individuals specifically trained and experienced in the installation of this type equipment and related system components. Installation and service personnel are required by some states to be licensed. Persons not qualified shall not attempt to install this equipment nor interpret the instructions.

INSTALLATION INSTRUCTIONS:

1. Loosely fasten the battery brackets to the bottom of the battery pan with the four 5/8" hex-head bolts, washers, and lock nuts provided. (See figure.) The bolts should be inserted through the battery pan and straps with the threads down. Place the washer and lock nut on the bolts (beneath the straps).

2. Place the assembled battery mounting pan onto the tongue of the trailer as shown in figure 1. Adjust the sliding straps so they rest on the frame rails. Securely tighten the battery bracket bolts.

3. Using the two holes in the battery pan and the holes in each bracket as a template, drill two 7/32" holes through the top of each frame tube.

4. Fasten the battery pan assembly to the frame with the four 3/4" bolts provided.

5. Place the battery in an appropriate sized battery box and follow the instructions included with the box to fasten it to the battery mount pan.

6. Apply battery connect label to trailer tongue near wire harness.
This battery mount kit can only be used on trailers equipped with the black (Norco) tongue jacks. The silver (Atwood) tongue jacks are not tall enough to clear the battery when installed.
