

SUNBRELLA 302 CARE AND CLEANING

With Sunbrella 302 fabric, most dirt will simply brush right off. Any dirt or soil that lingers can be removed easily with mild soap and water.

For stains, spot wash by sponging briskly with a solution of natural soap in lukewarm water. Rinse thoroughly with clean water and allow to air dry.

For stubborn stains, use Brush Top, Kleenol 1 Spot Remover, or any commercial dry cleaning fluid. **PLEASE FOLLOW ALL DIRECTIONS ON THE CONTAINER.** Rinse thoroughly with clean water and allow to air dry.

Mildew may grow on dirt and other foreign substances that are not removed from the fabric. To clean mildew stains, use a commercially available stain remover. **PLEASE FOLLOW ALL DIRECTIONS ON THE CONTAINER.** Rinse thoroughly with clean water and allow to air dry.

Light cleaning as routine maintenance is important to extend the life of the tenting. To keep it looking and performing at its best, the Sunbrella 302 tenting should be cleaned before storage.

When removing dirt and stains, always spot clean. While repeated cleaning will not diminish the inherent properties of Sunbrella 302 fabric, it may deteriorate the stitching or other components of the tenting. As with any treated fabric, repeated cleanings and extended use may gradually reduce the effectiveness of Sunbrella 302's water, soil, and stain repellent finish. Revitalize the fabric's original protective finish with 303 High Tech Fabric Guard™ or 3M Scotchgard Fabric Protector (red plaid can only). This will enhance the performance of Sunbrella 302 throughout the life of the fabric.
