

## FIBROPOOL FH 120 POOL HEAT PUMP ADDENDUM TO USER MANUAL

### Adjusting the Temperature

1. Make sure the heater is on StandBy mode by confirming only one temperature is shown on the display.
  2. Press SET button until reaching setting "1" (should be factory set for 82°F)
  3. Hold UP and DOWN buttons at the same time for about 3-5 seconds, until hearing a beep.
  4. The controls are now unlocked and the temperature can be changed with the UP and DOWN buttons.
  5. When the desired temperature is selected, press the ON/OFF button to confirm the selection.
- 

### Clock Function

Our updated heater control software now includes a programmable clock which displays the time.

To adjust the time:

1. Hold SET button until the time begins flashing on the display (about 5 seconds)
  2. Press UP or DOWN buttons to adjust the hour
  3. Press SET to confirm the hour selection and proceed to the minute selection
  4. Press UP or DOWN to adjust the minute
  5. Press SET to confirm minute selection and register the time
- 

### SET Button Functions

- Our updated software now displays each setting option as 0, 1, 2. Our older units will display the setting options as 00, 01, 02.
  - Operationally the settings are identical to each other and should not affect the tutorials or instructions
-
