# PaperThermometer™
TEMPERATURE-INDICATING DEVICES

PRODUCT SPECIFICATIONS

3-TEMP THERMOLABEL® Temperature Indicators

A popular irreversible registering temperature indicator for dishwasher sanitation (and HACCP compliance). Our completely waterproof 3-Temp Thermolabel features temperature sensitive elements that produces a non-reversible white to black color change at their rated temperature. This provides a clear indication that the temperature has been reached. The temperature elements are fully enclosed and protected with a clear plastic overlay, providing both moisture protection and durability, making these labels ideal for a wide range of applications. Store in a cool, dry place; preferably under refrigeration.

Unit of Measurement	Package
Labels Per Package	16
Dimensions	1'' x 1 13/16''
Country of Manufacture	USA

Waterproof	Yes
Response Time	Approximately 10 to 15 seconds
Product Expiration	2 years
Indication Method	Non-toxic white to black color change

TL3-150	150°F 65.6°C	160°F 71°C	170°F 77°C
TL3-160	160°F 71°C	170°F 77°C	180°F 82°C

These test strips can be used in meeting the requirements of United States FDA Food Code, Section 4-501.112.

Product Instructions:
Remove label from sheet. Adhere to a clean surface. Press firmly and ensure that there is full contact with the test surface. Heat/run through procedure that is being tested. The gray/white temperature sensitive elements will turn black as the rated temperature is reached. The highest temperature reached will be between the last black temperature element and the first gray/white temperature element. Allow to cool to the touch before slowly peeling the label off the test surface to avoid leaving adhesive residue.
