### LIMITED TWO-YEARS WARRANTY (USA)

LONGINES is delighted that you should have chosen a model from our prestigious collection. The little technical marvel you now own will serve you faithfully for many years. The most advanced techniques were used during its manufacture, and it underwent stringent controls before it was released for sale. Your LONGINES® watch is warranted by Longines Watch Co. Francillon Ltd\* for a period of twenty-four (24) months from the date of purchase under the terms and conditions of this warranty.

The international LONGINES warranty covers material and manufacturing defects existing at the time of delivery of the purchased LONGINES watch ("defects"). The warranty only comes into force if the warranty certificate is dated, fully and correctly completed and stamped by an official LONGINES dealer ("valid warranty certificate").

During the warranty period and by presenting the valid warranty certificate, you will have the right to have any defect repaired free of charge. In the event that repairs are improper to restore the normal conditions of use of your LONGINES watch, Longines Watch Co. Francillon Ltd guarantees its replacement by a LONGINES watch of identical or similar characteristics. The warranty for the replacement watch ends twenty-four (24) months after the date of purchase of the replaced watch.

### This manufacturer's warranty does not cover:

- the life of the battery;
- normal wear and tear and aging (e.g. scratched crystal; alteration of the colour and/or material of non metallic straps and chains, such as leather, textile, rubber; peeling of the plating);
- any damage on any part of the watch resulting from abnormal / abusive use, lack of care, negligence, accidents (knocks, dents, crushing, broken crystal, etc.), incorrect use of the watch and non-observance of the use directions provided by Longines Watch Co. Francillon Ltd;
- the LONGINES watch handled by non-authorized persons (e.g. for battery replacement, services or repairs) or which has been altered in its original condition beyond Longines Watch Co. Francillon Ltd's control.

ALL APPLICABLE IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE GIVEN TO YOU BY LAW ARE HEREBY LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. UNDER NO CIRCUMSTANCES WILL LONGINES WATCH CO. FRANCILLON LTD BE LIABLE FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND.

Some states do not allow limitations on how long implied warranties last, or exclusions or limitations of incidental or consequential damages, so exclusions or limitations mentioned may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

LONGINES WATCH CO. FRANCILLON LTD'S OBLIGATION IS STRICTLY LIMITED TO REPAIR OR REPLACEMENT AS EXPRESSLY STATED IN THIS LIMITED WARRANTY. YOUR OFFICIAL LONGINES DEALER CARRIES SOLE RESPONSIBILITY FOR ANY OTHER GUARANTEES.

The Longines Watch Co. Francillon Ltd's customer service ensures the perfect working order of your LONGINES watch. If your watch needs maintenance, rely on an official LONGINES dealer or an authorized LONGINES Service Center as set forth in the enclosed list: they can guarantee service according to Longines Watch Co. Francillon Ltd's standards.

**AUSTRALIAN / NEW ZEALAND WARRANTY**

**NOTE:** If you purchased your LONGINES® watch in Australia or New Zealand, the International LONGINES® Warranty contained in the booklet provided with this watch and on the LONGINES® website ([www.longines.com](http://www.longines.com)) does NOT apply to you, and is replaced by this Australian / New Zealand Warranty (referred to below as the "Warranty").

**IMPORTANT NOTICE REGARDING YOUR CONSUMER RIGHTS**

The benefits given to you under this Warranty are additional to, and do not detract from, other rights and remedies that you may have in relation to your LONGINES® watch and its purchase under Australian or New Zealand laws, including consumer protection laws.

In Australia, LONGINES® watches come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have your LONGINES® watch repaired or replaced if it fails to be of acceptable quality and the failure does not amount to a major failure.

In New Zealand, LONGINES® watches also come with guarantees that cannot be excluded under the New Zealand Consumer Guarantees Act.

This Warranty:

- Is not intended to change or exclude any statutory or consumer rights that cannot be lawfully changed or excluded;
- Is independent of any warranty that may be provided by the seller, for which he carries sole responsibility; and
- Does not affect your rights against the seller, including any mandatory statutory rights you may have against the seller under local consumer laws.

**OUR WARRANTY TO YOU**

This Warranty is provided by LONGINES WATCH CO. FRANCILLON LTD, CH-2610 Saint Imier, Switzerland.

Telephone +41 329 42 52 66.

Your LONGINES® watch is covered by this Warranty for a period of twenty-four (24) months from the date of purchase under the terms and conditions of this Warranty.

This Warranty covers material and manufacturing defects existing at the time of delivery of the purchased LONGINES® watch ("defects"). Where such defects become apparent during the warranty period and provided you present a valid warranty certificate, LONGINES WATCH CO. FRANCILLON LTD will:

- Repair your watch free of charge; or
- In the event that repairs are unable to restore the normal conditions of use of your LONGINES® watch, replace your watch with a LONGINES® watch of identical or similar characteristics. Such replacement watch will have the benefit of this Warranty for the remainder of the Warranty Period applicable to the original (replaced) watch.

**Please be aware that:**

- Goods presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods;
- Any data you store in your watch may be lost in the course of a repair. It is your responsibility to back up any data that may be stored in your watch before presenting it for warranty service; and
- The Warranty is only valid if the warranty certificate enclosed with your LONGINES® watch upon purchase is dated, fully and correctly completed and stamped by an official LONGINES® retailer.

## EXCLUSIONS AND LIMITATIONS

This Warranty does not cover:

- The lifetime of the battery;
- Normal wear and tear and aging (e.g. scratched crystal; alteration of the colour and/or material of non-metallic straps and chains, such as leather, textile, rubber; peeling of the plating);
- Any damage on any part of the watch resulting from abnormal/abusive use, lack of care, negligence, accidents (knocks, dents, crushing, broken crystal, etc.), incorrect use of the watch and non-observance of the use directions provided by LONGINES WATCH CO. FRANCILLON LTD;
- Indirect or consequential damages of any kind resulting from e.g. the use, the non-functioning, the defects or the inaccuracy of the LONGINES® watch; or
- Defects caused by the LONGINES® watch being handled by non-authorized persons (e.g. for battery replacement, services or repairs) or altered in its original condition beyond LONGINES WATCH CO. FRANCILLON LTD's control.

## HOW TO MAKE A CLAIM UNDER THIS WARRANTY

To make a claim under this Warranty, we recommend that you wrap your LONGINES® watch carefully so as to avoid any damage and send it with valid warranty by registered mail or drop it off in person to your nearest official LONGINES® retailer or an authorised LONGINES® Service Centre. To find current contact information for your nearest official LONGINES® retailer or authorised LONGINES® Service Centre, please telephone +61 3 8844 3300, email [customer.service@swatchgroup.com.au](mailto:customer.service@swatchgroup.com.au) or go to [www.longines.com](http://www.longines.com).

You will be responsible for paying the expenses associated with making a claim under this Warranty, including postal or delivery expenses and any relevant taxes.

## OTHER CONDITIONS

No official LONGINES® retailer or Service Centre is authorised to make any modification, extension or addition to this Warranty. LONGINES WATCH CO. FRANCILLON LTD provides no warranty against defects beyond the rights and remedies given under this Warranty and which are available under the Australian Consumer Law and the New Zealand Consumer Guarantees Act 1993.

LONGINES® is a registered trademark of LONGINES WATCH CO. FRANCILLON LTD.

### INTERNATIONAL GUARANTEE

LONGINES is delighted that you should have chosen a model from our prestigious collection. The little technical marvel you now own will serve you faithfully for many years. The most advanced techniques were used during its manufacture, and it underwent stringent controls before it was released for sale. Your LONGINES® watch is warranted by Longines Watch Co. Francillon Ltd\* for a period of twenty-four (24) months from the date of purchase under the terms and conditions of this warranty.

The international LONGINES warranty covers material and manufacturing defects existing at the time of delivery of the purchased LONGINES watch ("defects"). The warranty only comes into force if the warranty certificate is dated, fully and correctly completed and stamped by an official LONGINES dealer ("valid warranty certificate").

During the warranty period and by presenting the valid warranty certificate, you will have the right to have any defect repaired free of charge. In the event that repairs are improper to restore the normal conditions of use of your LONGINES watch, Longines Watch Co. Francillon Ltd guarantees its replacement by a LONGINES watch of identical or similar characteristics. The warranty for the replacement watch ends twenty-four (24) months after the date of purchase of the replaced watch.

#### **This manufacturer's warranty does not cover:**

- the life of the battery;
- normal wear and tear and aging (e.g. scratched crystal; alteration of the colour and/or material of non metallic straps and chains, such as leather, textile, rubber; peeling of the plating);

- any damage on any part of the watch resulting from abnormal/abusive use, lack of care, negligence, accidents (knocks, dents, crushing, broken crystal, etc.), incorrect use of the watch and non-observance of the use directions provided by Longines Watch Co. Francillon Ltd;
- indirect or consequential damages of any kind resulting from e.g. the use, the non-functioning, the defects or the inaccuracy of the LONGINES watch;
- the LONGINES watch handled by non-authorized persons (e.g. for battery replacement, services or repairs) or which has been altered in its original condition beyond Longines Watch Co. Francillon Ltd's control.

Any further claim against Longines Watch Co. Francillon Ltd e.g. for damages additional to the above described warranty is expressly excluded, except mandatory statutory rights the purchaser may have against the manufacturer.

#### **The above manufacturer's warranty is:**

- independent of any warranty that may be provided by the seller, for which he carries sole responsibility;
- does not affect the purchaser's rights against the seller nor any other mandatory statutory rights the purchaser may have against the seller.

The Longines Watch Co. Francillon Ltd's customer service ensures the perfect maintenance of your LONGINES watch. If your watch needs attention, rely on an official LONGINES dealer or an authorised LONGINES Service Center as set forth in the enclosed list: they can guarantee service according to Longines Watch Co. Francillon Ltd's standards.

LONGINES® is a registered trademark.

## CHECKS / SERVICES

### How often should my watch be checked?

We recommend that your watch's water-resistance be checked every year (partial service with movement check).

### How often should my watch be serviced?

Like any other precision instrument a watch should be serviced regularly to ensure that it runs perfectly. We cannot say how often you should have your watch serviced as this depends on the model, the climate where you live and how you look after the watch yourself. As a rule, a watch should be serviced every 4 or 5 years, depending on the conditions in which it is worn.

### Where should I go to get my watch serviced or for a new battery?

We recommend that you go to an approved LONGINES agent or retailer. They are the only people who have the necessary tools and apparatus to work on your watch and to carry out the necessary checks to a professional level. Moreover, only specialists can guarantee that their work meets the stringent quality standards set by LONGINES.

### What can I do to ensure that my LONGINES watch functions perfectly for many years?

**Magnetic fields:** avoid putting your watch on a loud-speaker or on a refrigerator because these machines create magnetic fields that may damage it.

**Salt-water:** always rinse your watch in fresh water after swimming in the sea.

**Shocks:** avoid subjecting your watch to shocks, including sudden changes in temperature.

**Screw-in crown:** always make sure you have screwed the crown in fully to avoid any humidity getting into the mechanism.

**Push-in crown:** always push the crown back in to the neutral position to avoid any humidity getting into the mechanism.

**Cleaning:** use a toothbrush and soapy water to clean metal bracelets and water-resistant cases and a soft cloth to dry off afterwards.

**Chemical products:** avoid all direct contact with solvents, detergents, perfume, cosmetics, etc. which may damage the bracelet or strap, the case or the seals.

**Temperatures:** avoid exposing your watch to extreme temperatures (over 60 °C or 140 °F and under 0 °C or 32 °F) and to sudden fluctuations in temperature.

**Water-resistance:** we cannot guarantee that your watch will be permanently water-resistant. The seal may be affected by wear or by an accidental shock to the crown. As recommended in our service instructions, you should have the water-resistant seals of your watch tested once a year by an approved LONGINES agent.

**Chronograph push-pieces:** do not adjust the push-pieces under water as this may allow humidity to get into the mechanism.

## PRECAUTIONS REGARDING WATER-RESISTANCE

If your watch is water-resistant it is essential that the seals be checked each year before the bathing season because, without your realising it, they might have been damaged as the result of a shock.

If the case has to be opened for any reason, the seals for the glass and the case-back as well as the crown (and/or push-pieces) must be checked and, if necessary, replaced.

When used as a WATCH, the quartz movement L441 indicates a local time (hour, minute and small seconds), plus the date in a window.

In its JUMPING function, this model can be used to time and manage events (penalties) in equestrian jumping competitions, under Tables A and C of the Fédération Equestre Internationale (FEI).

#### TABLE A

Competitors are ranked by time taken to complete the round, and the number of penalties obtained.

#### TABLE C

Competitors are ranked only by their round time. Penalties for knock-downs are automatically added to their round time.

In its CHRONOGRAPH function, this model can time events lasting up to one minute, while displaying the results to 1/100th of a second with the chronograph STOP.

#### INITIALISE

The settings can be initialised at any time and from any mode by pressing and holding push-piece **C** for 4 seconds.

The watch will enter CHRONOGRAPH mode.

Furthermore, this action reinitialises the JUMPING mode programming.

You can then go through the JUMPING mode programming steps from the beginning.

## Penalties under Table A

FAULT	PENALTY
(i) First Disobedience	Four Penalties
(ii) Obstacle knocked down while jumping	Four Penalties
(iii) One or more feet in the water jump or an imprint made by the foot or shoe on the lath defining its limits on the landing side	Four Penalties
(iv) First fall of Horse or Athlete or both in all Competitions	Elimination
(v) Second Disobedience or other infringement set forth under JRs Art. 241	Elimination
(vi) Exceeding the time limit	Elimination
(vii) Exceeding the time allowed in the first and second rounds and jump-offs not against the clock	One Penalty for every four seconds commenced
(viii) Exceeding the time allowed in a jump-off against the clock	One Penalty for each second or commenced fraction of a second

## Penalties under Table C

FAULT	PENALTY
Obstacle knocked down while jumping, one or more feet in the water jump or on the lath defining its limits on the landing side	Four seconds (three seconds for two-phase Competitions, knock-out Competitions and for any jump-off under table C). An exception may be permitted by the FEI Jumping Director allowing indoor Competitions to be run with two seconds added for a knock down.
(i) First Disobedience	None
(ii) First Disobedience, with a knock down and/or displacing of an obstacle	Time correction of six seconds
(iii) Second Disobedience or other infringement set forth under JRs Art. 241	Elimination
(iv) First fall of Horse or Athlete or both in all Competitions	Elimination

From the FEI JUMPING RULES / 25th edition, 1 January 2014

## JUMPING MODE

### Push-piece **C**

- Initialise the watch
- Enter and exit setting mode
- Round phases\*
- Navigate within setting mode

### Pts/sec penalties counter

Chronograph seconds and  
1/100ths of a second counter

#### \* The phases of a jumping round are:

1. Start countdown
2. Start chronograph
3. Stop chronograph
4. Reset

Tables and minute timing  
counter

### Push-piece **A**

- Increment values,
- Pause/resume countdown,
- Pause/resume round time or  
countdown

### Push-piece **B**

- Decrement values
- Add and subtract penalties

## PROGRAMMING

### 1. Initialise

#### 4 SECONDS **C**

Press and hold the push-piece until the hands move for the second time.

- The central counter seconds hand and chronograph hundredths of a second counter hand are positioned to 12 o'clock.
- The tables counter hand is positioned to 12 o'clock.
- The **pts/sec** penalties counter hand is positioned to zero.

Action for returning to CHRONOGRAPH function and reinitialising the JUMPING mode programming.

### 2. Enter JUMPING mode programming

#### 2 SECONDS **C**

- The central counter seconds hand is positioned to 4 o'clock, while the hundredths hand remains at 12 o'clock.
- The tables counter hand is positioned to **A**.
- The **pts/sec** penalties counter hand is positioned to **4**.

Default configuration upon entering JUMPING mode programming.

### 3. Select TABLE A

PRESS **C**

- The tables counter hand completes one high-speed rotation. Default configuration with TABLE A applied.

### 4. Save TABLE A selection

PRESS **C**

- The central counter seconds hand completes one high-speed rotation.
- The tables counter hand completes one high-speed rotation.
- Program the allotted round time.

### 5. Program allotted time

PRESS **A** and **B**

- Allotted time programmed with the central counter seconds hand. The tables counter indicates when the time exceeds 60, 120 or 180 seconds.
- Each press on push-piece **A** increments the chronograph central counter by one second.
- Each press on push-piece **B** decrements the chronograph central counter by one second.

Pressing and holding push-piece **A** or **B** increments or decrements the counter in 15-seconds steps.

### 6. Save allotted time

PRESS **C**

- The **pts/sec** penalties counter hand completes one high-speed rotation.
- Program the number of penalties added for exceeding the allotted time.

### 7. Program the number of penalties added for exceeding the allotted time pre-programmed in step No.5

PRESS **A** and **B**

- Default value, 1 penalty point is added every 4 seconds started.
- The **pts/sec** penalties counter points to **4**.
- Alternatively, you can select 1 penalty point for every second started.
- Pressing push-piece **B** moves the **pts/sec** penalties counter hand to 1.
- Pressing push-piece **A** moves the **pts/sec** penalties counter hand to **4**.

### 8. Save final programming

2 SECONDS **C**

- The central counter seconds hand and chronograph hundredths of a second counter hand are positioned to 12 o'clock.
- The tables counter hand points to **A**.
- The **pts/sec** penalties counter hand points to zero.

The watch is ready to time a jumping competition round under TABLE A, with an allotted time programmed in step No.5.

You can exit JUMPING mode programming after each setting step.

2 SECONDS **C**

OR

8. Back to step No.3 
 ↙ Select TABLE A  
 ↘ Select TABLE C

PRESS **C**

### 3. Select TABLE C

#### PRESS C

- The tables counter hand completes one high-speed rotation.
- Default configuration with TABLE A applied.

When push-piece **A** is pressed, the tables counter hand points to 120 under TABLE C.

#### Press **A** to go to TABLE C

#### Press **B** to go back to TABLE A

For this example under TABLE C, go back to TABLE C by pressing push-piece **A**.

### 4. Save TABLE C selection

#### PRESS C

- The central counter seconds hand completes one high-speed rotation.
- The tables counter hand completes one high-speed rotation.
- Program the round elimination time limit under TABLE C.

### 5. Program the elimination time limit

Using push-pieces **A** and **B**

- You can choose between two elimination time limits, either 120 or 180 seconds, depending on the course length.
- Press **A** to go to 180 seconds for courses over 500 metres.
- Press **B** to go to 120 seconds for courses under 500 metres.

### 6. Save the elimination time limit

#### PRESS A

- The **pts/sec** penalties counter hand completes one high-speed rotation.
- Program the number of seconds added for faults committed by the rider.

### 7. Program the number of seconds added per fault

Using push-pieces **A** and **B**

- By default, 4 seconds' penalty per fault are applied on the watch.
- Each press on push-piece **C** decrements the **pts/sec** penalties counter. You can select 4, 3 or 2 added seconds for each fault committed by the rider.
- Each press on push-piece **A** increments the **pts/sec** penalties counter. You can select 2, 3 or 4 added seconds for each fault committed by the rider.

### 8. Save final programming

#### 2 SECONDS C

- The central counter seconds hand and chronograph hundredths of a second counter hand are positioned to 12 o'clock.
- The tables counter hand points to **C**.
- The **pts/sec** penalties counter hand points to zero.
- The watch is ready to time a jumping competition round under TABLE C, with an elimination time limit programmed in step No.5.

You can exit JUMPING mode programming after each setting step.

#### 2 SECONDS C

OR

- 8. Back to step No.3 
 ↗ Select TABLE A  
 ↘ Select TABLE C

#### PRESS C

## TIMING THE ROUND

### 9. Start countdown

- The seconds central counter hand moves to 3 o'clock at high speed, and the 45-second countdown starts instantly.
- The parameters entered previously are displayed for information on the **pts/sec** penalties and tables counters.

### 10. Start timing the rider's round when the rider passes the start cell before the end of the countdown

- Timing starts.
- The **pts/sec** penalties counter hand and tables hand are zeroed.

#### OR

- Timing starts automatically at the end of the countdown, even if the rider has not passed the start cell.
- The **pts/sec** penalties counter hand and tables hand are zeroed.

### 11. If the rider commits a fault under TABLE A

- Each press on push-piece **B** increments the **pts/sec** penalties counter by 4 penalty points.
- You can remove any penalties added in error by pressing and holding push-piece **B** for 2 seconds.

### 12. If the rider commits a fault under TABLE C

- Each press on push-piece **B** instantly adds the number of seconds programmed in step no.7.
- You can remove any seconds penalties added in error by pressing and holding push-piece **B** for 2 seconds.
- The measured time can be paused under both TABLE A and TABLE C.

- Resume round without rider fault.

- Resume round with fault committed by rider, and a penalty of 6 seconds added to the measured time.

### 13. End timing

Stop timing, and display time to one hundredth of a second.

**14. Read result under TABLE A**

If the measured time is more than 60, 120 or 180 seconds, these transitions are displayed on the red arc of the tables counter.

- Seconds are displayed on the central counter.
- Hundredths of a second are displayed on the central counter, and read on the dial flange.
- The penalties on the **pts/sec** penalties counter are displayed in base 4.

OR

**14. Read result under TABLE C**

If the measured time is more than 60, 120 or 180 seconds, these transitions are displayed on the black arc of the tables counter.

- Seconds are displayed on the central counter.
- Hundredths of a second are displayed on the central counter, and read on the dial flange.
- The penalties on the **pts/sec** penalties counter are displayed in base 4.
- It is possible to find out the proportion of the time to complete the round, and the proportion due to penalties, using push-piece **B**.

 **PRESS B**

To go back to the official, time press push-piece **A**.

 **PRESS A**

*NB Time is the only criterion adopted under TABLE C.*

**15. Reset**

 **PRESS C**

Press push-piece **C** to reset the chronograph and time the next rider, without changing programming.

**Then restart at step No.9.**

**INITIALISE**

The settings can be initialised at any time and from any mode by pressing and holding push-piece **C** for 4 seconds.

The watch will enter CHRONOGRAPH mode.

Furthermore, this action reinitialises the JUMPING mode programming.

You can then go through the JUMPING mode programming steps from the beginning.

## 3-POSITION CROWN

### Simple function

In this function, with the crown stem in position **1**, push-piece **A** is used to switch the chronograph status between START and STOP.

After START is pressed, the counter hands will show the measured time. The 1/100th of a second counter hand will not turn.

When STOP is pressed, the 60-second counter hand will stop running. The 1/100th of a second counter hand will move to show the one hundredths of a second value.

To measure another time, press push-piece **B** to return the counters to zero (RESET). All the hands will quickly return clockwise to their start point, and the chronograph will switch back to watch mode.

### Time setting and stop seconds

To synchronise the watch with an official time signal (radio, telephone, etc.), pull the crown stem out to its furthest position **3**, when the small seconds hand is at 60, then push the crown fully back in again (pos. **1**) at the time signal.

The calendar changes every time the hour hand passes midnight.

### Minute and seconds adjustment

Pull the crown out to its furthest position **3**; the 3 counter hands will move to 12 o'clock. Turn the crown stem out to correct the hour and minute hands. Turn the crown stem either way to correct the minute.

Then push the crown fully back in again (pos. **1**).

### Changing the time zone and the date

Pull the crown out to the intermediate position **2**. The hour hand will make one-hour jumps, enabling quick time zone adjustments by turning the crown. The hour hand can be moved in either direction without affecting the minute and seconds hands. Turning the crown through 24 hours will change the date. The crown stem can be turned either way. Then push the crown fully back in again (pos. **1**).

## Chronograph functions

- **Standard Start-Stop function.**  
Simple time measurement – Timing 100 metres.
- **ADD function (partial times).**  
Adds several times together – Timing. Used to pause the measured time, and then resume.
- **Split function (intermediate times)**  
This function is used to time intermediate times in a single event. Intermediate times are calculated accumulatively throughout the event.

### Standard start-stop function

#### Timing a single event:

- Press push-piece **A**:  
to start the chronograph.
- Press push-piece **A**:  
to stop the chronograph.
- Press push-piece **B**:  
to reset.

### Split function (intermediate times)

This function is used to time one single event. Intermediate times are calculated accumulatively throughout the event.

**IMPORTANT!** While the watch displays an intermediate time the chronograph function will still be timing the event.

- Press push-piece **A** at the start of the event you wish to time, for example a 100 m sprint.
- Press push-piece **B** to see the first intermediate time; the 60-second counter hand will stop, and the 1/100th of a second counter hand will move to the measured one hundredth.
- Press push-piece **B** again. The chronograph hand will catch up to the time elapsed since the start of the race. To see the second intermediate time, repeat the procedure:
- Press push-piece **B** once to see the second intermediate time measured to 1/100th of a second, and again to make the chronograph hands catch up to the elapsed time **B**.
- At the end of the race, press push-piece **A** to see the total time for the race.
- Reset **B**

**NOTE:** The split/intermediate times function can also be used to record consecutively the times of various competitors as they finish a race.

### Resetting the chronograph hands

If for any reason the chronograph hands do not return exactly to zero, take the following action:

- Pull the crown out to the intermediate position **2**; the 4 hands on the CHRONO 1/100th of a SECOND counter and central CHRONO 60-SECOND counter, TABLES A and C counter at 2 o'clock and penalty points or seconds counter at 10 o'clock, will complete one high-speed rotation.

If the watch was in RESET status, the hands are already zeroed. If there is a timing operation in progress, the hands will return to their start point. Then they will all complete one high-speed rotation.

Pressing push-piece **C** will move the selected hand to indicate which hand will be moved by pressing push-piece **B** or **A**.

Each successive press on **C** selects the next hand.

A short press on push-piece **A** + will move the selected counter one step clockwise.

A short press on push-piece **B** – will move the selected counter one step anti-clockwise.

### Examples:

#### 1. Chronograph 1/100th of a second counter (centre):

With the crown in position **2**, press push-piece **C**. The 1/100 hand completes a circle of the dial if you press **A** or **B**. The position of said hand can be adjusted.

#### 2. Chronograph 60-second counter (centre):

With the crown in position **2**, press push-piece **C**, and then adjust with push-piece **A** or **B**.

#### 3. Chronograph TABLE A or C counter (at 2 o'clock):

With the crown in position **2**, press push-piece **C**, and then adjust with push-piece **A** or **B**.

#### 4. Chronograph penalty points or seconds counter (at 10 o'clock):

With the crown in position **2**, press push-piece **C**, and then adjust with push-piece **A** or **B**.

Then push the crown fully back in again (pos. **1**).

**IMPORTANT!** Never set the time while the chronograph function is being used.

### Important notes

- It is possible to combine the various Chrono functions (SIMPLE, ADD & SPLIT) in the same timing operation.
- Unless the chronograph is stopped (STOP pressed), the chronograph hands will not stop running. Continuous running of the chronograph will greatly reduce the autonomy of the movement.

### Battery end-of-life mode (EOL)

When the battery is fitted, its voltage is measured by the micro-controller. If the voltage is below the EOL level, the chronograph functions are suspended, and the movement small seconds is stopped.

If the battery voltage decreases and the risk of function loss arises, EOL mode is activated. EOL mode is activated if the battery voltage is below the EOL level for more than one hour. If the battery voltage climbs above the EOL level for more than 15 minutes, EOL mode is deactivated. This scenario may occur in particular if the watch has been temporarily exposed to low temperatures.

In this mode:

- The small seconds hand moves jerkily. The hand moves 4 steps quickly, and then remains immobile for 4 seconds.
- The chronograph can no longer be activated (START) for approximately one hour after EOL mode has been activated.
- If the chronograph was active at this time, it will continue to run, though there could be step loss.

### Quartz movements

The ambient temperature influences the precision of a quartz movement, which can vary from  $-0.3$  to  $+0.5$  seconds per day.

If your watch is quartz, the electrical energy is supplied by a battery. After 12 to 18 months' use (with the exception of watches equipped with lithium batteries), the battery voltage may fall abruptly and cause a watch stoppage. Certain models

are equipped with a battery end-of-life indicator (EOL). On these, the seconds hand will jump every 4 seconds. In this case, it is recommended to have the battery replaced immediately, since once drained, it could cause internal damage to your watch.

### Collection and treatment of end of life quartz watches\*

This symbol indicates that this product should not be disposed of as household waste. It must be returned to an approved collection point. By following this procedure you will contribute to safeguarding the environment and human health. Recycling the materials will help to conserve natural resources.

\* Valid in the EU member states and in any countries with corresponding legislation.

### Replacing the battery

We recommend you contact an approved LONGINES service centre or an authorised LONGINES retailer. They have the tools and equipment required to undertake this work on a professional footing. Any drained battery must be replaced as quickly as possible, to prevent the risk of leakage that could damage the movement.

### Battery type

Silver oxide and zinc button cell.
