

First Step :

Distinguish the direction, the 2cm opening of the cylinder is installed downwards

Second Step:

Unscrew the small screws

## Third Step:

Pass the fixed column into the connecting rod, please kindly note that the short position of the cylinder opening is facing up, where there are many notches, it faces downwards

Forth Step : Tighten the small screw

Fifth Step: Put all the wheels in a straight line

Sixth Step:

Put all the wheels into the track, be careful not to get the wheels in the wrong direction.

## Seventh Step:

Put the folding door upright and fix it with screws, please note that different walls use different kind of screws.

Eighth Step:

Fix the clips on the left and right sides according to the horizontal position of the track

Last Step :

Push the fixed column and the magnetic door column into the buckle respectively, and press firmly to fix it.
